**The Patchwork of World History in Texas High Schools** Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

*The New Politics of the Textbook* Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and disability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production

*Encounters Old and New in World History* Alan

Karras, Laura J. Mitchell, 2017-06-30 This collection of essays asserts the specific value of world history research and teaching showing how the field contributes to the larger historical profession and offering concrete suggestions to develop more interaction between the academy and the public The twelve contributors each with their own academic areas of interest are experienced scholars and classroom teachers Uniting them together in this volume is their professional relationship with Jerry H Bentley 1949 2012 This shared connection served as a catalyst to showcase Bentley s enduring legacy a commitment to investigating large scale questions with detailed empirical evidence that explains the human condition documenting both patterns of similarity and difference in ways that account for regional and temporal variations The volume continues Bentley s meticulous attention to world historical methods focus on scale cross cultural encounter comparison periodization critical geography and interdisciplinarity Encounters Old and New in World History responds to provocations that Jerry Bentley tendered in his scholarship and through his professional activities Contributors interrogate the institutional settings disciplinary proclivities methodological choices and diverse source bases of world history research and teaching Several essays address the ways in which present day concerns influence research on local and global scales Other essays pay particular attention to the production and circulation of knowledge across regional temporal and class boundaries as well as between the academy and the wider public Claiming the centrality of globally informed and focused approaches to historical inquiry researchers continue the conversations that Bentley carried on through his own scholarship teaching editing of the Journal of World History participating in public forums and contributing to public discussions about the place of history in understanding today s global integration The stakes involved in asking questions about the shared history of humankind continue to increase in the current era of intensified globalization It is incumbent upon scholars with the skills to work across linguistic geographic temporal and disciplinary boundaries to show the ways that cross cultural encounters happened historically and to point out how such interactions play out in the institutions classrooms and public debates where historical interpretations are created and shared

*The Trouble with Textbooks* Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran Saudi Arabia Egypt and elsewhere in the Arab and Muslim worlds are filled with anti Western and anti Israel propaganda Most readers will be shocked to discover that history and geography textbooks widely used in America s elementary and secondary classrooms contain some of the very same inaccuracies about Jews Judaism and Israel Did you know that there is no record of any important Jewish contribution to the sciences World Civilizations Thomson Wadsworth Or that Christianity was started by a young Palestinian named Jesus The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble

with Textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all The Power of Scale: A Global History Approach John Bodley,2015-06-01 Throughout history the natural human inclination to accumulate social power has led to growth and scale increases that benefit the few at the expense of the many John Bodley looks at global history through the lens of power and scale theory and draws on history economics anthropology and sociology to demonstrate how individuals have been the agents of social change not social classes Filled with tables and data to support his argument this book considers how increases in scale necessarily lead to an increasingly small elite gaining disproportionate power making democratic control more difficult to achieve and maintain

*Hollywood or History?* Scott L. Roberts,Charles J. Elfer,2021-01-01 The challenges of teaching history are acute where we consider the world history classroom Generalized world history courses are a part of many if not most K 12 curricular frameworks in the United States While United States history tends to dominate the scholarship and conversation there are an equally wide number of middle level and secondary students and teachers engaged in the study of world history in our public schools And the challenges are real In the first place if we are to mark content coverage as a curricular obstacle in the history classroom generally then we must underscore that concern in the world history classroom and for obvious reasons The curricular terrain to choose from is immense and forever expanding dealing with the development of numerous civilizations over millennia and across a wide geographic expanse In addition to curricular concerns world historical topics are inherently farther away from most students lives not just temporally but often geographically and culturally Thus the rationale for the present text *Hollywood or History* An Inquiry Based Strategy for

Using Film to Teach World History The reviews of the first volume Hollywood or History An Inquiry Based Strategy for Using Film to Teach United States History strategy have been overwhelmingly positive especially as it pertains to the application of the strategy for practitioner Classroom utility and teacher practice have remained our primary objectives in developing the Hollywood or History strategy and we are encouraged by the possibilities of Volume II and the capacity of this most recent text to impact teaching and learning in world history We believe that students connection to film along with teachers ability to use film in an effective manner will help alleviate some of the challenges of teaching world history The book provides 30 secondary lesson plans grades 6 12 that address nine eras in world history *The Times of Round Top* Cynthia A.

Thornton, 2013-10 Throughout the times of the land we call Round Top one thought has constantly prevailed This is a land of opportunity The land was formed over the centuries into flat land and hills by rivers beyond and by creeks and springs while waiting for animals and mankind to arrive This land is located in the northeastern margin of today s Fayette County and lies on a high hill that looks down toward the south into the bottom lands of a crossing The struggle on this small piece of land began with the movement of animals that needed a convenient place for water that was crossable during the seasons This perfect crossing flows through the south eastern side of the present town of Round Top located between two high hills This crossing was the home of native American Indians American settlers and German immigrants
