Evolution: A Big History Perspective Leonid E. Grinin,Andrey V. Korotayev,Barry H. Rodrigue,2011-09-29 This issue of the almanac aims at filling the gap in the mega evolutionary research The Editors believe that the present Almanac which brings together scientists working in different areas of the vast evolutionary field will hopefully make a contribution to this process The contributions to this volume are subdivided into three sections Universal Evolution Biological and Social Forms of Evolution Connections and Comparisons and Aspects of Social Evolution Subjects and issues of the contributions to all three sections have a great deal in common and significantly supplement each other **World History** Larry Krieger,1992

Global History, Globally Sven Beckert,Dominic Sachsenmaier,2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope Global History Globally addresses this lacuna by surveying the state of global history in different world regions Divided into three distinct but tightly interweaved sections the book s chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them Global History Globally is a must read book for all students and scholars of global history **Agricultural Transformation in a Global History Perspective** Ellen Hillbom,Patrick

Svensson,2013-03-05 History teaches us that agricultural growth and development is necessary for achieving overall better living conditions in all societies Although this process may seem homogenous when looked at from the outside it is full of diversity within This book captures this diversity by presenting eleven independent case studies ranging over time and space By comparing outcomes attempts are made to draw general conclusion and lessons about the agricultural transformation process **World History** Larry Krieger,1997 **Southeast Asia in World History** Craig Lockard,2009-04-24 Here is a brief well written and lively survey of the history of Southeast Asia from ancient times to the present paying particular attention to the region s role in world history and the distinctive societies that arose in lands shaped by green fields and

forests blue rivers and seas Craig Lockard shows how for several millennia Southeast Asians living at the crossroads of Asia enjoyed ever expanding connections to both China and India and later developed maritime trading networks to the Middle East and Europe He explores how the people of the region combined local and imported ideas to form unique cultures reflected in such striking creations as Malay sailing craft Javanese gamelan music and batik cloth classical Burmese and Cambodian architecture and social structures in which women have often played unusually influential roles Lockard describes colonization by Europeans and Americans between 1500 and 1914 tracing how the social economic and political frameworks inherited from the past combined with active opposition to domination by foreign powers enabled Southeast Asians to overcome many challenges and regain their independence after World War II The book also relates how Malaysia Singapore Thailand Indonesia and Vietnam are now among the fastest growing economies in the world and play a critical role in today s global marketplace
