Singer, 2012-04-27 Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity history and the contemporary world All chapters include lesson ideas a sample lesson plan with activity sheets primary source documents and helpful charts graphs photographs and maps High school students responses are woven in throughout Additional material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions leaving little time for an in depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions Offering an alternative to such pre packaged textbook outlines and materials this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it [A World History of War Crimes](#) Michael S. Bryant, 2015-12-17 A World History of War Crimes provides a truly global history of war crimes and the involvement of the legal systems faced with these acts Documenting the long historical arc traced by human efforts to limit warfare from codes of war in antiquity designed to maintain a religiously conceived cosmic order to the gradual use in the modern age of the criminal trial as a means of enforcing universal norms this book provides a comprehensive one volume

account of war and the laws that have governed conflict since the dawn of world civilizations Throughout his narrative Michael Bryant locates the origin and evolution of the law of war in the interplay between different cultures While showing that no single philosophical idea underlay the law of war in world history this volume also proves that war in global civilization has rarely been an anarchic free for all Rather from its beginnings warfare has been subject to certain constraints defined by the unique needs and cosmological understandings of the cultures that produce them Only in late modernity has law assumed its current international humanitarian form The criminalization of war crimes in international courts today is only the most recent development of the ancient theme of constraining when and how war may be fought
