Beyond Blue Skies Chris Petty,2020-11 In 1945 some experts still considered the so called sound barrier an impenetrable wall while winged rocket planes remained largely relegated to science fiction But soon a series of unique rocket powered research aircraft and the dedicated individuals who built maintained and flew them began to push the boundaries of flight in aviation s quest to move ever higher ever faster toward the unknown Beyond Blue Skies examines the thirty year period after World War II during which aviation experienced an unprecedented era of progress that led the United States to the boundaries of outer space Between 1946 and 1975 an ancient dry lakebed in California s High Desert played host to a series of rocket powered research aircraft built to investigate the outer reaches of flight The western Mojave s Rogers Dry Lake became home to Edwards Air Force Base NASA s Flight Research Center and an elite cadre of test pilots Although one of them Chuck Yeager would rank among the most famous

names in history most who flew there during those years played their parts away from public view The risks they routinely accepted were every bit as real as those facing NASA's astronauts but no magazine stories or free Corvettes awaited them just long days in a close knit community in the High Desert The role of not only the test pilots but the engineers aerodynamicists and support staff in making supersonic flight possible has been widely overlooked Beyond Blue Skies charts the triumphs and tragedies of the rocket plane era and the unsung efforts of the men and women who made amazing achievements possible A handbook on the new law of the sea. 2 (1991) René Jean Dupuy, Daniel Vignes, 1991-10-16 The fact that the Montego Bay Convention has been only ratified by 37 States at present and that it will be some time before the 60 ratifications required by Article 308 are achieved has not prevented states from acting in accordance with the rules drawn up by the Conference Close on one hundred states have established either exclusive economic zones broadly modelled on Part V or 200 nautical mile fishery zones and drawn on the principles laid down for exploiting living resources Although these laws have been formulated unilaterally by states international custom since the judgement by the International Court of Justice in the Fisheries Case of 18 December 1951 is derived from concordant national rules This shift began even before the Conference ended and has been consolidated since then Moreover the regime governing the sea bed beyond the limits of national jurisdiction defined by Part XI which was the stumbling block of the Conference is subject to transitional arrangements on the basis of two resolutions adopted in the Conference's Final Act one providing for the establishment of a Preparatory Commission and the other on the preliminary activities of pioneer investors This two volume work an earlier edition of which appeared in French has been written by a team of experts of international renown It presents an analysis of the Convention with an additional Chapter on the legal regime governing underwater archaeological and historical objects

Sinno, 2008 While popular accounts of warfare particularly of nontraditional conflicts such as guerrilla wars and insurgencies favor the roles of leaders or ideology social scientific analyses of these wars focus on aggregate categories such as ethnic groups religious affiliations socioeconomic classes or civilizations Challenging these constructions Abdulkader H Sinno closely examines the fortunes of the various factions in Afghanistan including the mujahideen and the Taliban that have been fighting each other and foreign armies since the 1979 Soviet invasion Focusing on the organization of the combatants Sinno offers a new understanding of the course and outcome of such conflicts Employing a wide range of sources including his own fieldwork in Afghanistan and statistical data on conflicts across the region Sinno contends that in Afghanistan the groups that have outperformed and outlasted their opponents have done so because of their successful organization Each organization s ability to mobilize effectively execute strategy coordinate efforts manage disunity and process information depends on how well its structure matches its ability to keep its rivals at bay Centralized organizations Sinno finds are generally more effective than noncentralized ones but noncentralized ones are more resilient absent a safe haven Sinno s organizational theory explains otherwise puzzling behavior found in group conflicts the longevity of unpopular regimes the demise of popular movements and efforts of those who share a common cause to undermine their ideological or ethnic kin The author argues that the

organizational theory applies not only to Afghanistan where he doubts the effectiveness of American state building efforts but also to other ethnic revolutionary independence and secessionist conflicts in North Africa the Middle East and beyond
