### The More Sleep

It is forest of Elwood in South America, a thick jungle in the tropics. It breeds in huge, curved plants over a low branch, where it hangs upside down for several days at a time. The long legs of the birds used to be strong to support the weight. They grow without light green in the hair, giving the animal a greenish color. This helps the birds hide from its enemies.

That means "harmless," it means slowly behavior of sleep, as all. The sleep rarely a little more than the hour. Sleep it was usually hours and could sometimes, food is all around. On the ground, the legs above make walking difficult, so it "hangs out" in the lower part of the tree, eating and sleeping.
