**History, Memory and Nostalgia in Literature and Culture** Regina Rudaitytė, 2018-07-27 The advent of the new age has alerted us to the conflicted nature of historical memory which defined the 20th century while simultaneously assaulting us with new historical upheavals that demand responsibility and critical

consideration As the historical text bears traces of the writing subject the element of deception is remarkable meaning historical memory easily lends itself to forgery and false and subjective projections As such how do we think about the past about history about memory and how does memory function Is history an objective account a collection of dry reliable facts Is it an imaginative narrative tinged with nostalgia a projection of our wishful thinking the workings of our subjective perceptions and attitudes our states of mind The essays in this volume focus on the relevance of the past to the present and future in terms of the shifting attitudes to personal and collective experiences that have shaped dominant Western critical discourses about history memory and nostalgia The contributors here take issue with the epistemological hermeneutic ethical and aesthetic dimensions of the representational practices through which we revisit and revise the meaning of the past

**Semiotics and Visual Communication** Evripides Zantides, 2014-04-11 This book is the result of selective research papers that were presented at the First International Conference on Semiotics and Visual Communication at the Cyprus University of Technology in November 2011 The conference was structured around the theme from theory to practice and brought together researchers and practitioners who study and evaluate the ways that semiotic theories can be analysed perceived and applied in the context of various forms in visual communication Within a semiotic framework the book explores research questions under five main thematic areas Architectural Spatial Design Design for Three Dimensional Products Design for Print Applications Design for Screen Based Media Pedagogy of Visual Communication and Visual Arts This volume will be an asset for people who have an interest in semiotics not only from a theoretical and historical perspective but also from an applied point of view looking at how semiotic theory can be implemented into educational research design and visual communication practice The book provides 25 essential contributions that demonstrate how the concepts and theories of semiotics can be creatively adapted within the interdisciplinary nature of visual communication **The Cambridge**

**Introduction to Scenography** Joslin McKinney, Philip Butterworth, 2009-11-19 Scenography the manipulation and orchestration of the performance environment is an increasingly popular and key area in performance studies This book introduces the reader to the purpose identity and scope of scenography and its theories and concepts Settings and structures light projected images sound costumes and props are considered in relation to performing bodies text space and the role of the audience Concentrating on scenographic developments in the twentieth century the Introduction examines how these continue to evolve in the twenty first century Scenographic principles are clearly explained through practical examples and their theoretical context Although acknowledging the many different ways in which design shapes the creation of scenography the book is not exclusively concerned with the role of the theatre designer In order to map out the wider territory and potential of scenography the theories of pioneering scenographers are discussed alongside the work of directors writers and visual artists *Multimodality* Janina Wildfeuer, Jana Pflaeging, John Bateman, Ognyan Seizov, Chiao-I Tseng, 2019-11-18 Multimodality s popularity as a semiotic approach has not resulted in a common voice yet Its conceptual

anchoring as well as its empirical applications often remain localized and disparate and ideas of a theory of multimodality are heterogeneous and uncoordinated For the field to move ahead it must achieve a more mature status of reflection mutual support and interaction with regard to both past and future directions The red thread across the disciplines reflected in this book is a common goal of capturing the mechanisms of synergetic knowledge construction and transmission using diverse forms of expressions i e multimodality The collection of chapters brought together in the book reflects both a diversity of disciplines and common interests and challenges thereby establishing an excellent roadmap for the future The contributions revisit and redefine theoretical concepts or empirical analyses which are crucial to the study of multimodality from various perspectives with a view towards evolving issues of multimodal analysis With this the book aims at repositioning the field as a well grounded scientific discipline with significant implications for future communication research in many fields of study

Multimodality John Bateman, Janina Wildfeuer, Tuomo Hiippala, 2017-04-10 This textbook provides the first foundational introduction to the practice of analysing multimodality covering the full breadth of media and situations in which multimodality needs to be a concern Readers learn via use cases how to approach any multimodal situation and to derive their own specifically tailored sets of methods for conducting and evaluating analyses Extensive references and critical discussion of existing approaches from many disciplines and in each of the multimodal domains addressed are provided The authors adopt a problem oriented perspective throughout showing how an appropriate foundation for understanding multimodality as a phenomenon can be used to derive strong methodological guidance for analysis as well as supporting the adoption and combination of appropriate theoretical tools Theoretical positions found in the literature are consequently always related back to the purposes of analysis rather than being promoted as valuable in their own right By these means the book establishes the necessary theoretical foundations to engage productively with today's increasingly complex combinations of multimodal artefacts and performances of all kinds

**Multimodality in Practice** Sigrid Norris, 2012-05-22 In this wide ranging collection leading scholars researchers and emergent researchers from around the world come together and present examples of multimodal discourse analysis in practice The book illustrates new theoretical methodological and empirical research into new technologies such as the internet software CD ROM video and older technologies such as film newspapers brands or billboards Each chapter demonstrates how aspects of multimodal theory and method can be used to conduct research into these and other multimodal texts Taken together the book advances the field of multimodal discourse analysis and offers a range of current studies that address some of the most important questions facing researchers and students when investigating new or old technologies multimodally in linguistics education communication studies sociology anthropology and other fields
