Labor Economics in an Islamic Framework Toseef Azid, Umar Burki, Muhammad Junaid Khawaja, Nasim Shah Shirazi, Muhammad Tahir, 2021-12-30 The labor market in Islam is governed by the Islamic laws of fairness justice and reward that is equivalent to the job done Most of the literature in the field discusses the normative aspect of the labor market whereas few attempts can be seen to address more positive aspects There is a need for new theoretical and empirical models for the Islamic labor market which should differ from established approaches This book provides a comprehensive overview of the nature scope and dimensions of the labor market in an Islamic context from both theoretical and practical perspectives It presents and discusses labor economics and then compares the similarities and differences between conventional and Islamic views of the labor market explaining where they meet and critically justifying why they differ under the umbrella of Shari ah The book raises pertinent issues which it analyzes from both standpoints and widens the discourse to include norms morality and related institutions such as social

security and welfare A unique feature of the book is that it examines labor economics practices among a specific group of countries and studies the labor conditions within these countries where the majority of the population follow the teachings of Islam in their daily lives The book proposes practical strategies for the development of new models for the Islamic labor market which are compatible with the modern world The book will enable academics and practitioners of Islamic economics to make economic sense of Shari ah compliance and human resource development

The Pure Theory of International Trade Miltiades Chacholiades, 2017-07-12 There has long been a need for a systematic introduction to the modern pure theory of international trade that would take the student through a careful introduction to the tools of analysis and the main logical propositions into the application of the theory to practical problems of international economic policy Trade theory should be part and parcel of price theory distinguished only by the fact that other countries form part of the natural opportunities and natural constraints that a country confronts in its efforts to bend nature to its desire to produce utility yielding goods and services but its exposition is often confused by the attachment of its expositors to obsolete problems and backward analytical techniques This book covers in detail classical neoclassical and modern theories of international trade with special attention to problems of equilibrium growth and welfare and discusses the work of all major contributors in this field from Ricardo and Mill through Meade Heckscher and Ohlin to the growth models of Johnson Solow and Uzawa All problems are clearly stated and the easiest and most convenient solutions are sought in each case with the more technical topics in the field discussed in several chapters and appendixes that may be omitted for less advanced students without interrupting the continuity of the book The book s coverage is complete and entirely up to date It is written primarily for advanced undergraduate and graduate courses in international trade but it will also serve as an important reference tool for professional economists working in this field and will be of considerable interest to students and practitioners dealing with problems of economic development and international business relationships more generally
