**The Vision Revolution** Mark Changizi,2010-06-08 In The Vision Revolution How the Latest Research Overturns Everything We Thought We Knew About Human Vision Mark Changizi prominent neuroscientist and vision expert addresses four areas of human vision and provides explanations for why we have those particular abilities complete with a number of full color illustrations to demonstrate his conclusions and to engage the reader Written for both the casual reader and the science buff hungry for new information The Vision Revolution is a resource that dispels commonly believed perceptions about sight and offers answers drawn from the field s most recent research Changizi focuses on four why questions 1 Why do we see in color 2 Why do our eyes face forward 3 Why do we see illusions 4 Why does reading come so naturally to us Why Do We See in Color It was commonly believed that color vision evolved to help our primitive ancestors identify ripe fruit Changizi says we should look closer to home ourselves Human color vision evolved to give us greater insights into the mental states and health of other people People who can see color changes in skin have an advantage over their color blind counterparts they can see when people are blushing with embarrassment purple faced with exertion or the reddening of rashes Changizi s research reveals that the cones in our eyes that allow us to see color are exquisitely designed exactly for seeing color changes in the skin And it s no coincidence that the primates with color vision are the ones with bare spots on their faces and other body parts Changizi shows that the development of color vision in higher primates closely parallels the loss of facial hair culminating in the near hairlessness and highly developed color vision of humans Why Do Our Eyes Face Forward Forward facing eyes set us apart from most mammals and there is much dispute as to why we have them While some speculate that we evolved this feature to give us depth perception available through stereo vision this type of vision only allows us to see short distances and we already have other mechanisms that help us to estimate distance Changizi s research shows that with two forward facing eyes primates

and humans have an x ray ability Specifically we re able to see through the cluttered leaves of the forest environment in which we evolved This feature helps primates see their targets in a crowded encroached environment To see how this works hold a finger in front of your eyes You ll find that you re able to look through it at what is beyond your finger One of the most amazing feats of two forward facing eyes Our views aren t blocked by our noses beaks etc Why Do We See Illusions We evolved to see moving objects not where they are but where they are going to be Without this ability we couldn t catch a ball because the brain s ability to process visual information isn t fast enough to allow us to put our hands in the right place to intersect for a rapidly approaching baseball If our brains simply created a perception of the way the world was at the time light hit the eye then by the time that perception was elicited which takes about a tenth of a second for the brain to do time would have marched on and the perception would be of the recent past Changizi explains Simply put illusions occur when our brain is tricked into thinking that a stationary two dimensional picture has an element that is moving Our brains project the moving element into the future and as a result we don t see what s on the page but what our brain thinks will be the case a fraction of a second into the future Why Does Reading Come So Naturally to Us We can read faster than we can hear which is odd considering that reading is relatively recent *Kicks for a Sinner* Lynn Shurr,2014-06-27 Cassie Thomas is all grown up and certain she is in love with Joe Dean Billodeaux star quarterback for the Sinners and adoptive father to the son she gave away at birth Joe only wants to expand his family with his wife Nell and deflect Cassie s advances So why not set Cassie up with the Sinners new kicker and possibly the world s nicest guy Howard Howdy McCoy Cassie sees through Joe s attempt and insults Howdy telling him he is not a real football player and possibly even gay Howdy knows neither is the case Regarding Cassie to be as challenging as a sixty yard field goal he sets out to prove her wrong even if it involves a personal makeover and a tough new attitude But will he be able to convince a woman who believes she can love only bad boys to give a nice guy a chance **The Woman in the Red Dress** Minrose Gwin,2002 Graceful and impassioned The Woman in the Red Dress offers important new approaches to narratives about father daughter incest as well as stories that contaminate the myth of home as a safe space and map a geography of sexual violence victimization and survival Gwin situates her analysis of fiction such as Morrison s *The Bluest Eye* Alice Walker s *The Color Purple* Dorothy Allison s *Bastard out of Carolina* and Jane Smiley s *A Thousand Acres* within contemporary debates concerning survivor discourse theories of domestic space and issues of race and class She also explores books such as Hulme s *The Bone People* that enter a murky and liminal queer space in which gender itself travels and the most claustrophobic physical and social spaces can unexpectedly unhinge and open **The Essential Guide to Mindful Dressing** Jules Standish,2016-12-09 Mindfulness is all the rage and now it can sort out your wardrobe Wouldn t it be wonderful if every day you could feel happy calm and in control simply by choosing the right colours to wear What could be more fabulous than that This book tells you how and reveals the secrets of how colours can make you radiate with happiness and well being and how you can achieve calm in a frantic world This is the essential guide to mindful
