George, Cornelius B. Pratt, 1997-08-13 *Case Studies in Crisis Communication* International Perspectives on Hits and Misses was created to fill the gap for a much needed textbook in case studies in crisis communication from international perspectives The events of September 11 2001 other major world crises and the ongoing macroeconomic challenges of financial institutions justify the need for this book While existing textbooks on the subject focus on U.S. corporate cases they may not appeal equally to students and practitioners in other countries hence the need to analyze cases from the United States and from other world regions The variety and the international focus of the cases be they environmental health or management successes or failures makes this book more appealing to a wider audience These cases examine socio cultural issues associated with responding to a variety of crises Corporate Identity and Crisis Response Strategies Olga Bloch, 2014-06-10 The history of crisis management shows that companies embark on particular

strategies in response to crisis So why are some companies crisis communication strategies successful while others are not The purpose of this book is to broaden the existing knowledge of crisis response strategies by focusing on corporate identity as one of the factors that is most likely to influence their choice Drawing upon insights from the sensemaking and chaos theories as well as traditional and alternative non European approaches to strategy formation Olga Bloch contends that there is a reciprocal relationship between corporate identity and crisis response strategies This relationship is examined on the example of Toyota Motor Corporation s communication in response to a crisis caused by a series of recalls of its vehicles in 2009 2010 *The Brand Innovation Manifesto* John Grant, 2011-01-19 The days of the image brands are over and new marketing has gone mainstream The worlds biggest companies are pursuing a post advertising strategy moving away from advertising and investing in leading edge alternatives In the vanguard of the revolution has been John Grant co founder of the legendary agency St Lukes and author of *The New Marketing Manifesto* whose radical thinking has informed a generation Now Grant is set to stun the industry again In *The Brand Innovation Manifesto* he redefines the nature of brands showing why old models and scales no longer work and revealing that the key to success today is impacting peoples lifestyles think Starbucks iPod and eBay At the heart of the book is the concept of the brand molecule to which new cultural ideas can be constantly added to keep pace with change Cataloguing 32 classes of idea Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas and new ideas for existing brands *Ecopiety* Sarah McFarland Taylor, 2019-11-12 Tackles a human problem we all share the fate of the earth and our role in its future Confident that your personal good deeds of environmental virtue will save the earth The stories we encounter about the environment in popular culture too often promote an imagined moral economy assuring us that tiny acts of voluntary personal piety such as recycling a coffee cup or purchasing green consumer items can offset our destructive habits No need to make any fundamental structural changes The trick is simply for the consumer to buy the right things and shop our way to a greener future It s time for a reality check *Ecopiety* offers an absorbing examination of the intersections of environmental sensibilities contemporary expressions of piety and devotion and American popular culture Ranging from portrayals of environmental sin and virtue such as the eco pious depiction of Christian Grey in *Fifty Shades of Grey* to the green capitalism found in the world of mobile device carbon sin tracking software applications to the socially conscious vegetarian vampires in *True Blood* the volume illuminates the work pop culture performs as both a mirror and an engine for the greening of American spiritual and ethical commitments Taylor makes the case that it is not through a framework of grim duty or obligation but through one of play and delight that we may move environmental ideals into substantive action

Environmental Advertising in China and the USA Xinghua Li, 2016-05-05 Since the late 1980s green consumerism has been hailed in the West as an efficient solution to environmental problems However Chinese consumers have been slow to warm up to eco friendly products Consumers prefer SUVs to hybrid cars health supplements and snake oil medicines to

organic foods and eco fashion is still secluded in high end designer studios These choices contradict the findings of many sustainable lifestyle surveys that claim to register a rising desire for green products among the Chinese This book examines the psycho cultural differences that disrupt the translation of eco friendly appeals to China by analyzing environmental advertising It explores the different notions of green the structures of desire that underlies the advertisements and how they are shaped by ideological cultural and historical differences Rather than arguing the superiority of the American or Chinese version of green consumerism the book interrogates the role of advertising in the global spread of Western ideologies and explores the possibilities for consumers to resist transnational corporate hegemony in the green movement This book fills an important gap in the critical scholarship on green marketing and should be of interest to students and scholars of environment studies green advertising and marketing environmental communication and media studies China studies and environmental sociology ethics and cultural studies
