Krischke,Alexandra K. Becnel,2024-01-10 This is the only book in existence that discusses the process of documenting an investigation from start to finish It presents just about everything an investigator needs to know regarding how to document an investigation This new edition builds upon the principles outlined in the first edition but the new edition has a criminal defense bent with numerous case examples provided that include insurance claims and civil litigation criminal defense murders sexual assaults and other serious felonies particularly wrongful convictions These require meticulous documentation Proper documentation matters most in criminal cases This book therefore will focus also on the rights of those accused of crimes The first chapter discusses the five primary principles of investigative documentation taking comprehensive notes documenting every effort to contact witnesses and all surveillance preparing reports whenever there is any possibility of needing to testify taking verbatim statements from hostile witnesses and declarations from friendly witnesses and providing all case documents to the client or maintaining a document retention plan The second chapter details the numerous misconceptions pertaining to investigative documentation This chapter sets the stage for the remaining chapters on note taking running resumes reports statements and documentation retention Each chapter is broken down into four or five sections that approximate the methods used to complete that particular documentary endeavor The book also contains an exhaustive appendix that many investigators will find to be very useful This is an advanced book for people who already have the necessary skills to do an investigation By following the principles outlined in this book investigators will see the quality of their investigations improve markedly and ultimately be more successful Although the authors have chosen to refocus the second edition on criminal defense investigations where proper documentation is most important the principles herein remain the benchmark of how to document any investigation in the private sector *Lemon-Aid New and Used Cars and Trucks 1990-2015* Phil Edmonston,2013-11-18 Lemon Aid New and Used Cars and Trucks 1990 2015 steers the confused and anxious buyer through the purchase of new and used vehicles unlike any other car and truck book on the market Dr Phil Canada s best known automotive expert for more than 42 years pulls no punches *Internet of Energy Handbook* Pawan Kumar,Srete Nikolovski,Z Y Dong,2021-05-31 The Internet of Energy IoE with the integration of advanced information and communication technologies ICT has led to a transformation of traditional networks to smart systems Internet of Energy

Handbook provides updated knowledge in the field of energy management with an Internet of Things IoT perspective Features Explains the technological developments for energy management leading to a reduction in energy consumption through topics like smart energy systems smart sensors communication techniques and utilization Includes dedicated sections covering varied aspects related to renewable sources of energy power distribution and generation Incorporates energy efficiency optimization and sensor technologies Covers multidisciplinary aspects in computational intelligence and IoT Discusses building energy management aspects including temperature humidity the number of persons involved and light intensity This handbook is aimed at graduate students researchers and professionals interested in power systems IoT smart grids electrical engineering and transmission

Lithium-Ion Cells Yury Koshtyal ,Alexander Rumyantsev,2024-12-24 A large quantity of articles and books have been published on the designated topics However most of the literary sources describe the results of scientific articles on the synthesis and study of perspective materials reveal circuit and design solutions for constructing control systems and manufacturing batteries and are educational materials At the same time a small part of the published sources includes the following descriptions of materials produced industrially and used in the LIC manufacturing process demonstrations of the industrially produced LIC energy and power parameters analysis of the characteristics of manufactured miniature lithium ion cells solid state LICs lithium metal cells and all solid state cells as well as others Considering the popularity of the discussed topics one can hope to find detailed information on the Internet Indeed modern search engines make it possible to locate a sufficiently large number of relevant documents However while conducting such research we encountered the following challenges the data are somewhat fragmented and their systematization and structuring are required search results do not always meet search queries For instance data that were relevant to the topic were found but they did not match the query as accumulated data grow the search time for new information extends the choice of search engine and location different countries affects search results the data are not indexed in search engines although the correct keywords and website were requested the information disappears due to website updates and the found data require additional processing For example many presentations show changes in the shape of the discharge curves depending on the discharge current strength In addition however Ragone plots are necessary for a correct comparison and therefore the mathematical processing of presented results is required Thus this book was written to systematize and structure information on industrially produced materials for LIC manufacturing and industrially produced and promising LICs and lithium metal rechargeable cells for various applications

[T]axing Greenhouse Gases Lex Fullarton, 2019-03-30 Lex Fullarton takes a closer look at the three pillars of the sustainable development framework known as the Triple Bottom Line TBL The concept of the TBL is that for a project to be sustainable it must not simply be profitable in economic terms but it must also benefit society and enhance the natural environment In the 21st century the greatest threat to Earth's natural environment and the population of the planet is the rise of greenhouse gas emissions caused from burning fossil fuel as an energy source The rise of GHG emissions has resulted in a rise in the ambient air temperature of the Earth's atmosphere and is resulting in a significant change in climatic conditions on Earth Fullarton scrutinizes the problem of getting industry and governments to understand the significance of creating harmony within the TBL One of the main problems is that partisan politics tends to fragment the factors of the TBL rather than bring them together Fullarton takes a strong stand in suggesting that taxation systems which have traditionally been viewed primarily as a means of raising government finance can be effectively applied to influence industrial and consumer attitudes towards transiting away from polluting fossil fuel energy sources towards non polluting renewable energy use
