Modern Marketing Communications Frank Jefkins, 2012-12-06 Marketing communications is a subject which has become popular in both marketing and public relations circles but sometimes with different parameters There are those who prefer to confine marketing communications to promotional activities which is mostly an academic point of view and there are those who see the subject in broader terms embracing every form of communication used in marketing which is how the

subject is practised in the business world While the author has long experience as a teacher and examiner he also continues to be a professional practitioner Consequently the book aims to serve those concerned with both the academic and the professional in interpretations of marketing communications It is of course hoped that those who adopt the academic approach to the subject will eventually acknowledge that there is more to marketing communications than advertising sales promotion selling marketing research and public relations It is also necessary to realise that public relations embraces much more than the publicity in the 4Ps promotion box Without wishing to be contentious this broad approach is proposed so that communications of all kinds throughout the marketing strategy can have maximum effect Very little has been published on this subject and the book is therefore a pioneer attempt to establish the practical parameters of modern marketing communications There are so many broad and narrow interpretations of marketing communications but it is hoped that this book will be useful to teachers students and practitioners of the subject *Young Children Learning* Tricia
