**The Transpacific Experiment** Matt Sheehan,2020-08-04 A timely vital account of California s unique relationship with China told through the exploits of the entrepreneurs activists and politicians driving transformations with international implications Tensions between the world s superpowers are mounting in Washington D C and Beijing Yet the People s Republic of China and the state of California have built deep and interdependent socioeconomic exchanges that reverberate across the globe making California and China a microcosm of the most important international relationship of the twenty first century In The Transpacific Experiment journalist and China analyst Matt Sheehan chronicles the real people who are making these connections Sheehan tells the story of a Southern Californian mayor who believes a Chinese electric bus factory will save his town from meth labs and skinheads He follows a Chinese AI researcher who leaves Google to compete with his former employer from behind the Great Firewall Sheehan joins a tour bus of wealthy Chinese families shopping for homes in the Bay Area revealing disgruntled neighbors and raising important questions about California s own narratives around immigration and the American Dream Sheehan s on the ground reporting reveals movie sets in the Hollywood of China Chinese funded housing projects in San Francisco Chinese immigrants who support Donald Trump and more Each of these stories lays bare the new reality of twenty first century superpowers the closer they get to one another the more personal their frictions become Cuts right to the heart of the relationship between Silicon Valley and China the tangled history the current tensions and the uncertain future a must read Kai Fu Lee former president of Google China and founder of Sinovation Ventures

**The Politics of Fracking** Sarmistha R. Majumdar,2018-08-29 Over the last decade the oil and gas industry has garnered a lot of support from the United States federal and state governments in the name of energy independence and economic prosperity More specifically hydraulic fracturing or fracking is said to not only make the production of affordable energy possible but also reduce emissions of carbon dioxide by substituting coal with natural gas in the utility sector Behind the fa ade of many socio economic and political benefits the process of fracking causes serious environmental concerns Dismissing the negative externalities of fracking simply raises the question to what extent have communities close to fracking sites been adversely impacted by it In this book Sarmistha R Majumdar studies four communities close to fracking well sites in Texas to help illustrate to what extent fracking regulations have been developed in Texas and how effective these regulations have been in safeguarding the interests of individuals in local communities amidst the lure of economic gains from the extraction of oil and natural gas from shale formations Majumdar has developed a model to show stage by stage community actions to regain their quality of life and the consequences of their actions if any on state

and local regulations and ordinances and the oil and gas industry This book will be an important resource for scholars of environmental and natural resource politics and policy in the United States **Middle East and North Africa Economic Monitor, October 2016** Devarajan, Shantayanan ,Mottaghi, Lili ,2016-08-23 The year 2016 appears to be one of the toughest for the Middle East and North Africa MENA region as their governments face serious policy challenges The biggest challenge for oil exporters is managing their finances and diversification strategies with oil below 45 a barrel Fiscal consolidation in a difficult sociopolitical environment and spillovers from conflicts are creating challenges for oil importers as well Real GDP growth in MENA for 2016 is projected to fall to its lowest level since 2013 2 3 percent lower than last year s growth by half a percentage point and about one percentage point lower than predicted in April 2016 It is clear that the disappointing performance of the MENA economies and possibly the global economy is partly due to the rise of terrorist attacks and spread of violent extremism In this report we attempt to shed light on the underlying causes of this phenomenon by applying an economic perspective to the demand for and supply of violent extremists Looking at a dataset on foreign fighters joining Daesh we find that the factors most strongly associated with foreign individuals joining Daesh have to do with a lack of inclusion economic social and religious in their country of origin Promoting greater inclusion therefore could not only bring down the level of violent extremism but it could improve economic performance in the MENA region

and limits on individual profit in a growing marketplace of goods And owners of old houses and ancestral estates developed methods of preservation to reconcile competing demands for the seclusion of and access to American homes to shape the ways that capitalism affected family economies In these ways individuals harnessed preservation to garner political economic and social profit from the performance of public service Ultimately Martinko argues by portraying the problems of the real estate market as social rather than economic advocates of preservation affirmed a capitalist system of land development by promising to make it moral **New National Real Estate Journal** ,1957 **Faith, Finance, and Economy** Tanweer Akram,Salim Rashid,2020-03-10 This open access book seeks to foster a multidisciplinary understanding of the ties between faith financial intermediation and economic progress by drawing on research across economics finance history philosophy ethics theology public policy law and other disciplines Chapters in this edited volume examine themes as consequential as economic opportunities real world outcomes and faith values and consumerism faith financial intermediation and economic development in Western and Islamic societies and the impact of faith issues on US workers on the workplace and religion and on the characteristics of good wealth Though engaging with difficult questions this book is written in an accessible style to be enjoyed by laypeople and scholars alike *Pictures of a Gone City* Richard A. Walker,2018-06-01 The San Francisco Bay Area is currently the jewel in the crown of capitalism the tech capital of the world and a gusher of wealth from the Silicon Gold Rush It has been generating jobs spawning new innovation and spreading ideas that are changing lives everywhere It boasts of being the Left Coast the Greenest City and the best place for workers in the USA So what could be wrong It may seem that the Bay Area has the best of it in Trump s America but there is a dark side of success overheated bubbles and spectacular crashes exploding inequality and millions of underpaid workers a boiling housing crisis mass displacement and severe environmental damage a delusional tech elite and complicity with the worst in American politics This sweeping account of the Bay Area in the age of the tech boom covers many bases It begins with the phenomenal concentration of IT in Greater Silicon Valley the fabulous economic growth of the bay region and the unbelievable wealth piling up for the 1% and high incomes of Upper Classes in contrast to the fate of the working class and people of color earning poverty wages and struggling to keep their heads above water The middle chapters survey the urban scene including the greatest housing bubble in the United States a metropolis exploding in every direction and a geography turned inside out Lastly it hits the environmental impact of the boom the fantastical ideology of TechWorld and the political implications of the tech led transformation of the bay region [The Future of Airbnb and the 'Sharing Economy'](#) Jeroen A.
