The Foundations of Scientific Inference Wesley C. Salmon, 2017-07-14 After its publication in 1967 *The Foundations of Scientific Inference* taught a generation of students and researchers about the problem of induction the interpretation of probability and confirmation theory Fifty years later Wesley C Salmon s book remains one of the clearest introductions to these fundamental problems in the philosophy of science This anniversary edition of Salmon s foundational work features a detailed introduction by Christopher Hitchcock which examines the book s origins influences and major themes its impact and enduring effects the disputes it raised and its place in current studies revisiting Salmon s ideas for a new audience of philosophers historians scientists and students *Explanation in Ethics and Mathematics* Uri D. Leibowitz, Neil Sinclair, 2016 How far should our realism extend For many years philosophers of mathematics and philosophers of ethics have worked independently to address the question of how best to understand the entities apparently referred to by mathematical and ethical talk But the similarities between their endeavours are not often emphasised This book provides that emphasis In particular it focuses on two types of argumentative strategies that have been deployed in both areas The first debunking arguments aims to put pressure on realism by emphasising the seeming redundancy of mathematical or moral entities when it comes to explaining our judgements In the moral realm this challenge has been made by Gilbert Harman and Sharon Street in the mathematical realm it is known as the Benacerraf Field problem The second strategy indispensability arguments aims to provide support for realism by emphasising the seeming intellectual indispensability of mathematical or moral entities for example when constructing good explanatory theories This strategy is associated with Quine and Putnam in mathematics and with Nicholas Sturgeon and David Enoch in ethics *Explanation in Ethics and Mathematics* addresses these issues through an explicitly comparative methodology which we call the companions in illumination approach By considering how argumentative strategies in the philosophy of mathematics might apply to the philosophy of ethics and vice versa the papers collected here break new ground in both areas For good measure two further companions for illumination are also broached the philosophy of chance and the philosophy of religion Collectively these comparisons light up new questions arguments and problems of interest to scholars interested in realism in any area ***The Cambridge Handbook of Evolutionary Ethics*** Michael Ruse, Robert J. Richards, 2017-08-24 This book introduces readers to the application of evolutionary ideas to moral thinking and justification presenting contrasting perspectives on controversial issues ***Oxford Studies in Metaethics 13*** Russ Shafer-Landau, 2018-07-18 *Oxford Studies in Metaethics* is the only publication devoted exclusively to original philosophical work in the foundations of ethics It provides an annual selection of much of the best new scholarship being done in the field Its broad purview includes work being done at the intersections of ethical theory with metaphysics epistemology philosophy of language and philosophy of mind The essays included in the series provide an excellent basis for understanding recent developments in the field those who would like to acquaint themselves with the

current state of play in metaethics would do well to start here *A Companion to Experimental Philosophy* Justin Sytsma, Wesley Buckwalter, 2016-03-28 This is a comprehensive collection of essays that explores cutting edge work in experimental philosophy a radical new movement that applies quantitative and empirical methods to traditional topics of philosophical inquiry Situates the discipline within Western philosophy and then surveys the work of experimental philosophers by sub discipline Contains insights for a diverse range of fields including linguistics cognitive science anthropology economics and psychology as well as almost every area of professional philosophy today Edited by two rising scholars who take a broad and inclusive approach to the field Offers a complete introduction for non specialists and students to the central approaches findings challenges and controversies in experimental philosophy *Evolutionary Debunking Arguments* Diego E. Machuca, 2022-09-09 Recent years have seen an explosion of interest in evolutionary debunking arguments directed against certain types of belief particularly moral and religious beliefs According to those arguments the evolutionary origins of the cognitive mechanisms that produce the targeted beliefs render these beliefs epistemically unjustified The reason is that natural selection cares for reproduction and survival rather than truth and false beliefs can in principle be as evolutionarily advantageous as true beliefs The present volume brings together fourteen essays that examine evolutionary debunking arguments not only in ethics and philosophy of religion but also in philosophy of mathematics metaphysics and epistemology The essays move forward research on those arguments by shedding fresh light on old problems and proposing new lines of inquiry The book will appeal to scholars and graduate students interested in the possible skeptical implications of evolutionary theory in any of the above domains *Making All the Difference* Martha Minow, 2016-10-01 Should a court order medical treatment for a severely disabled newborn in the face of the parents refusal to authorize it How does the law apply to a neighborhood that objects to a group home for developmentally disabled people Does equality mean treating everyone the same even if such treatment affects some people adversely Does a state requirement of employee maternity leave serve or violate the commitment to gender equality Martha Minow takes a hard look at the way our legal system functions in dealing with people on the basis of race gender age ethnicity religion and disability Minow confronts a variety of dilemmas of difference resulting from contradictory legal strategies strategies that attempt to correct inequalities by sometimes recognizing and sometimes ignoring differences Exploring the historical sources of ideas about difference she offers challenging alternative ways of conceiving of traits that legal and social institutions have come to regard as different She argues in effect for a constructed jurisprudence based on the ability to recognize and work with perceptible forms of difference Minow is passionately interested in the people different people whose lives are regularly mis shaped and mis directed by the legal system s ways of handling them Drawing on literary and feminist theories and the insights of anthropology and social history she identifies the unstated assumptions that tend to regenerate discrimination through the very reforms that are supposed to eliminate it Education for handicapped children conflicts between job and

family responsibilities bilingual education Native American land claims these are among the concrete problems she discusses from a fresh angle of vision Minow firmly rejects the prevailing conception of the self that she believes underlies legal doctrine a self seen as either separate and autonomous or else disabled and incompetent in some way In contrast she regards the self as being realized through connection capable of shaping an identity only in relationship to other people She shifts the focus for problem solving from the different person to the relationships that construct that difference and she proposes an analysis that can turn difference from a basis of stigma and a rationale for unequal treatment into a point of human connection The meanings of many differences can change when people locate and revise their relationships to difference she asserts The student in a wheelchair becomes less different when the building designed without him in mind is altered to permit his access Her book evaluates contemporary legal theories and reformulates legal rights for women children persons with disabilities and others historically identified as different Here is a powerful voice for change speaking to issues that permeate our daily lives and form a central part of the work of law By illuminating the many ways in which people differ from one another this book shows how lawyers political theorist teachers parents students every one of us can make all the difference

Oxford Studies in Metaethics, Volume 17 Russ Shafer-Landau, 2022-03-21 Oxford Studies in Metaethics is the only publication devoted exclusively to original philosophical work in the foundations of ethics It provides an annual selection of much of the best new scholarship being done in the field Its broad purview includes work being done at the intersections of ethical theory with metaphysics epistemology philosophy of language and philosophy of mind The essays included in the series provide an excellent basis for understanding recent developments in the field those who would like to acquaint themselves with the current state of play in metaethics would do well to start here New Conversations on the

Problems of Identity, Consciousness and Mind Jonathan O. Chimakonam, Uti Ojah Egbai, Samuel T. Segun, Aribiah D. Attoe, 2019-02-23 This book introduces concepts in philosophy of mind and neurophilosophy Inside three scholars offer approaches to the problems of identity consciousness and the mind In the process they open new vistas for thought and raise fresh controversies to some of the oldest problems in philosophy The first chapter focuses on the identity problem The author employs an explanatory model he christened sense phenomenalism to defend the thesis that personal identity is something or a phenomenon that pertains to the observable perceptible aspect of the human person The next chapter explores the problem of consciousness It deploys the new concept equiphénoménalism as a model to show that mental properties are not by products but necessary products of consciousness Herein the notion of qualia is a fundamental and necessary product that must be experienced simultaneously with neural activities for consciousness to be possible The last chapter addresses the mind body problem It adopts the new concept proto phenomenalism as an alternative explanatory model This model eliminates the idea of a mind As such it approaches the mind body problem from a materialistic point of view with many implications such as the meaning lessness of our existence the possibility of thought engineering as well as religious

implications **Moral Skepticism** Diego E. Machuca,2017-10-20 Moral skepticism is at present a vibrant topic of philosophical inquiry Particularly since the turn of the millennium the debates between moral skeptics of various stripes and their opponents have gained renewed force not only by taking account of innovative ideas in moral philosophy but also by drawing on novel positions in epistemology metaphysics and philosophy of language as well as on recent findings in empirical sciences As a result new arguments for and against moral skepticism have been devised while the traditional ones have been reexamined This collection of original essays will advance the ongoing debates about various forms of moral skepticism by discussing such topics as error theory disagreement constructivism non naturalism expressivism fictionalism and evolutionary debunking arguments It will be a valuable resource for academics and advanced students working in metaethics and moral philosophy more generally **Common Sense** Noah Lemos,2004-08-23 In this 2004 book Noah Lemos presents a strong defense of the common sense tradition the view that we may take as data for philosophical inquiry many of the things we ordinarily think we know He discusses the main features of that tradition as expounded by Thomas Reid G E Moore and Roderick Chisholm For a long time common sense philosophers have been subject to two main objections that they fail to give any non circular argument for the reliability of memory and perception and that they pick out instances of knowledge without knowing a criterion for knowledge Lemos defends the appeal to what we ordinarily think we know in both epistemology and ethics and thus rejects the charge that common sense is dogmatic unphilosophical or question begging Written in a clear and engaging style this book will appeal to students and philosophers in epistemology and ethics **The Reasonableness of Reason** Bruce W. Hauptli,1995 Another school of rationalists realistic rationalists manages to avoid the paradox which besets justificatory rationalism but Hauptli shows this approach rests on a maxim as arbitrary as that of the kerygmatic rationalists *Care and Commitment* Jeffrey Blustein,1991 In this book Blustein presents the first study of an ethics of care offering a detailed exploration of human care in its various guises concern for and commitment to individuals ideals and causes Blustein focuses on the nature and value of personal integrity and intimacy and on the questions they raise for traditional moral theory Among the topics considered are what is the nature of caring as such what do we and should we care about what is implied by the claim that caring supports a sense of the meaningfulness of our lives how does caring benefit the one who cares and what is the good of care how do we care about caring Clearly and accessibly written this book takes a fresh look at the issues surrounding personal values and relationships Rationality and Moral Theory Diane Jeske,2008-08-18 This book combines the details of the lived moral life the context in which many of our most pressing moral questions arise with theoretical rigor in offering an account of the nature of reasons how we come to have moral knowledge and how we can adjudicate between competing positions **Evolutionary Origins of Morality** Leonard D. Katz,2000 This volume includes four principal papers and a total of 43 peer commentaries on the evolutionary origins of morality ,
