Education and Curricular Perspectives in the Qur'an Sarah Risha, 2014-12-11 Education and Curricular Perspectives in the Qur'an is a unique academic study that focuses on different perspectives of education curriculum in the Qur'an. Sarah Risha explains how Allah Almighty as the great teacher communicated His divine message the Qur'an which may be considered as the textbook to His students the prophets. The primary source is the Qur'an itself and sayings of the Prophet Mohammed when necessary. While curriculum is a broad term, Risha addresses five aspects in particular to examine how the Qur'an deals with this vital element and connects this central religious text to current academic curriculum studies.

Handbook of Research on Applied Social Psychology in Multiculturalism Christiansen, Bryan, Chandan, Harish C., 2021-06-18 Social psychology is the scientific study of how the thoughts, feelings, and behaviors of individuals are influenced by the actual, imagined, and implied presence of others. In this definition, scientific refers to the empirical investigation using the scientific method, while the terms thoughts, feelings, and behaviors refer to the psychological variables that can be measured in humans. Moreover, the notion that the presence of others may be imagined or implied suggests that humans are malleable to social influences even when alone, such as when watching videos or quietly appreciating art. In such situations, people can be influenced to follow internalized cultural norms. Social psychology deals with social influence, social perception, and social interaction. The research in this field deals with what shapes our attitudes and how we develop prejudice. The *Handbook of Research on Applied Social Psychology in Multiculturalism* explores social psychology within the context of multiculturalism and the way society deals with cultural diversity at national and community levels. It will cover major topics of social psychology such as group behavior, social perception, leadership, non-verbal behavior, conformity, aggression, and prejudice. This book will deal with social psychology with a direct focus on how different cultures can coexist peacefully by preserving, respecting, and even encouraging cultural diversity, along with a focus on the psychology that is hindering these efforts. This book is essential for researchers in social psychology and the social sciences, activists, psychologists, practitioners, researchers, academicians, and students interested in how social psychology interacts with multiculturalism.

Pratt, 1997-08-13 Case Studies in Crisis Communication International Perspectives on Hits and Misses was created to fill the gap for a much needed textbook in case studies in crisis communication from international perspectives The events of September 11 2001 other major world crises and the ongoing macroeconomic challenges of financial institutions justify the need for this book While existing textbooks on the subject focus on U S corporate cases they may not appeal equally to students and practitioners in other countries hence the need to analyze cases from the United States and from other world regions The variety and the international focus of the cases be they environmental health or management successes or failures makes this book more appealing to a wider audience These cases examine socio cultural issues associated with responding to a variety of crises **The Long History of the Future** Nicole Kobie, 2024-07-04 We love to imagine the

future But why are groundbreaking future technologies always just around the corner and never a reality For decades we ve delighted in dreaming about a sci fi utopia from flying cars and bionic humans to hyperloops and smart cities And why not Building a better world be it a free flying commute or an automated urban lifestyle is a worthy dream Given the pace of technological change nothing seems impossible anymore But why are these innovations always out of reach Delving into the remarkable history of technology The Long History of the Future introduces us to the clever scientists genius engineers and eccentric innovators who first brought these ideas to life and have struggled to make them work since These stories reveal a more realistic picture of how these technologies may evolve and how we ll eventually get to use them You may never be able to buy a fully driverless car but automated braking and steering could slash collision rates Smart cities won t perfect city life but they could help empty bins on time Hyperloops may never arrive but superfast trains are already here We always believe current technology is the best it could be By looking to the past and the future Nicole Kobie shows how history always proves us wrong and how what lies ahead may not be what we imagine but so much better
