The automobile is an icon of modern technology because it includes most aspects of modern engineering and it offers an exciting approach to engineering education. Of course there are many existing books on introductory fluid aerodynamics but the majority of these are too long focussed on aerospace and don't adequately cover the basics. Therefore there is room and a need for a concise introductory textbook in this area. *Automotive Aerodynamics* fulfils this need and is an introductory textbook intended as a first course in the complex field of aerofluid mechanics for engineering students. It introduces basic concepts and fluid properties and covers fluid dynamic equations. Examples of automotive aerodynamics are included and the principles of computational fluid dynamics are introduced. This text also includes topics such as aeroacoustics and heat transfer which are important to engineering students and are closely related to the main topic of aerofluid mechanics. This textbook contains complex mathematics which not only serve as the foundation for future studies but also provide a road map for the present text. As the chapters evolve focus is placed on more applicable examples which can be solved in class using elementary algebra. The approach taken is designed to make the mathematics more approachable and easier to understand.

Key features: Concise textbook which provides an introduction to fluid mechanics and aerodynamics with automotive applications. Written by a leading author in the field who has experience working with motor sports teams in industry. Explains basic concepts and equations before progressing to cover more advanced topics. Covers internal and external flows for automotive applications. Covers emerging areas of aeroacoustics and heat transfer. *Automotive Aerodynamics* is a must have textbook for undergraduate and graduate students in automotive and mechanical engineering and is also a concise reference for engineers in industry.

True Crime British Killers - A Prequel Jason Neal, 2020-03-04

Six Disturbing Stories of some of the UK's Most Brutal Killers A Prequel to the True Crime Case Histories Series Over 7 000 Five Star Ratings worldwide A quick word of warning The true crime short stories within this book are unimaginably shocking Most news articles and television true crime shows skim over the offensive details of truly unsettling crimes In my books I try not to gloss over the facts regardless of how disgusting they may be My goal is to give my readers a clear and accurate description of just how demented the killers really were I do my best not to leave anything out The stories included in this book are not for the squeamish Many of my readers know I have split my last several years between London and Arizona As these past few months of 2019 and 2020 have been my final months in London I thought it would be fitting to write a book about some of the most notorious killers in UK history This book is not officially part of the True Crime Case Histories series but it's written in a very similar style A sampling of the stories includes The Camden Ripper A homeless man reached into a dumpster and felt what he thought were salmon fillets in a plastic bag What he found were two human legs severed at the knees London police started a manhunt for a demented murderer intent on fulfilling his obsession with Jack the Ripper The London Cannibal At 23 years old bludgeoned to death a young girl he had a crush on in broad daylight Found to have diminished responsibility he was committed to a psychiatric ward Within 11 years the killer was found to be no major

risk to society and was free to go Within hours of his release he had dismembered a friend and was frying parts of his body in a pan Sent back to the mental hospital his killing didn't stop The Acid Bath Killer One of the most notorious killers in UK history wrongfully believed if he could make a body disappear he couldn't be charged with murder Led by greed he dissolved his victims in vats of acid before acquiring their assets The Black Widow Dena Thompson was a bigamist that hated men Her first husband she drove into hiding from an imaginary mafia Another thought he would be getting kinky sex but instead got beaten within an inch of his life Her second husband wasn't so lucky The Bus Stop Killer A sadistic predator terrorized southwest London for years following young blonde girls from bus stops He would beat them on the head with a hammer simply for the sake of extinguishing life The Suffolk Strangler The quiet area of Ipswich in Suffolk normally sees very few killings in a year In 2006 in a span of only six weeks police found the bodies of five young women strangled Some posed to resemble a crucifix Plus One Bonus Chapter The six true crime stories included in this collection are dark and chilling and will leave you with a new understanding of just how fragile the human mind can be Check out the True Crime Case Histories series for more short stories of True Crime Murder Mayhem Serial Killer Biographies and True Murder Case Files This book includes Tony Hardy Peter Bryan John George Haigh Dena Thompson Levi Bellfield Marsha McDonnell Kate Sheedy Amelie Delagrang Milly Dowler Steven Wright Gemma Adams Anneli Alderton Paula Clennell Annette Nicholls

British Serial Killers Nigel Wier, 2011-12-30 The book is about British serial killers from the 19th century all the way to the present day I have written the book to show the readers what a serial killer is and why he is so different from any other killers In Britain it is estimated that there are between 70 and 80 known serial killers and the book will cover about 75% of them Fortunately for us most serial killers are arrested and sentenced to very long prison sentences and of course the earlier serial killers were executed But it also shows some serial killers who have remained unidentified and have never been arrested
