McIlvaine-Newsad,Meghan Matuszeski,2020      Rethinking the Anthropology of Magic and Witchcraft Phillips  
Stevens,2023-12 This book introduces students to the anthropology of magic witchcraft and supernatural belief It takes a  
new approach to this area within the anthropology of religion demonstrating that the bases for these beliefs and alleged  
practices are instinctual inherent in human cognition and psychology and are likely rooted in our evolutionary biology It  
shows how magic and magical thinking are regular elements in people s daily activities and that understanding the  
components of the witchcraft complex offers surprisingly important insights into patterns of thinking and social behavior The  
book reviews the many meanings of magic and witchcraft explains why they are inadequate and introduces the  
anthropological meanings of the terms The components of these beliefs are timeless and universal this fact and recent  
advances in the brain sciences suggest that the principles of magic are derived from basic processes of human thinking and  
the attributes of the witch derive from neuro biologically based fears and fantasies Such beliefs had adaptive significance in  
the evolutionary development of the human species they are inherently human This book is intended to focus anew on the  
core concepts of magic witchcraft and the supernatural while also serving as a valuable introduction to the anthropology of  
religion for undergraduate and graduate level courses      Religion, Myth, and Magic Susan Ann Johnston,2010-01-25
