Trade, 1921 The Argentine Economy Aldo Ferrer, 2023-04-28 Argentina poses a challenge to economists economic historians political scientists and other concerned with the interrelationship of political and economic forces in developing nations Although possessed of most of the attributes generally thought necessary for rapid and self-sustaining development her economy has barely kept up with the population increase and living standards of large segments of the population have not advanced The causes of this paradox have never been adequately explained Ferrer interprets the economic stagnation of Argentina in historical terms tracing the evolution of the country's economy through four separate stages beginning with the colonial era in the sixteenth century Most attention is given to the period of nonintegrated industrial economy from 1930 to the present According to Ferrer modern Argentina was formed in the second half of the nineteenth century when the country was integrated into the world economy as a large producer and exporter of agricultural products The great influx of immigrants and foreign capital led to a rapid disintegration of the traditional society which had been composed of isolated regional economies with a low level of economic and social development The Pampa area an open space that had been largely uninhabited became the nucleus of the subsequent expansion because of its rich land resources and humid and temperate climate The dislocation of the international economy after the world economic crisis of the 1930s and the rigidity of the Argentine agricultural economy confronted the country with need to industrialize and diversify its economic structure

Some progress has been made along this road but Ferrer attributes Argentina's postwar difficulties to the lack of proper answers to the problems of an agricultural economy in transition to a modern industrial society. The author relates economic data to the broader social and political issues. He foresees a definitive confrontation between two social and economic forces: one favoring maintenance of the status quo, the other advocating an enlightened policy of basic industrial growth. The outcome of this confrontation will have a profound impact on the future of Argentina and indeed all Latin America. Electronics and Industrial Policy Staffan Jacobsson, 2012-12-06 There is a rapidly expanding literature on the economics of the so-called new technologies, especially on those using microelectronic systems. Dr. Jacobsson's book deals with microelectronics-based innovation in machine tools with the production and use of computer numerically controlled machine tools in the world economy and especially in the Third World. Jacobsson is mainly interested in the implications which CNC machine tools may be expected to have for users and producers in the Newly Industrialising Countries. He approaches this as a problem in applied economics, and the book will have a primary interest for those economists whose concern is with the problems of industrialisation in developing countries. It will be particularly valuable to those who are preoccupied with the role of local capital goods manufacture and with the technological preconditions for this kind of production. Jacobsson is able to give detailed and specific arguments on these matters as far as CNC machine tools are concerned. In my view, the book has a considerably wider interest and relevance than its specification may at first sight suggest. Jacobsson's achievement is not just that he has provided valuable and convincing quantitative arguments about policy in setting up production of CNC machine

tools In addition he has set a new and much needed methodological standard for analysis of the impacts of new technologies on the international economy

Ideology and the Evolution of Vital Institutions Earl A. Thompson,Charles R. Hickson,2012-12-06 In this book Thompson and Hickson strongly challenge the standard interpretation of the basis of growth and viability of dominant wealthy nations Briefly efforts of the economically wealthy and the government leaders to increase their wealth and protect it from aggressors internal and external are cast in a new evolutionary light The challenge is to the idea that societies leading intellectual formulators of political and social policy have been helpful Their alternative and persuasive interpretation is that the rise and survival of wealthier nations has been achieved because of an effective democracy The authors explain why an effective democratic state must avoid narrow short sighted rational appearing concessions to a sequence of aggressors In short the Thompson Hickson interpretation of the rise of wealthy dominant nations does not rely on advice of superior intellectual advisors but instead rests on the pragmatic almost ad hoc actions of democratic legislators
