Chakraborty, 2021-03-03 Raising a child is wonderful as well as very challenging Once they born we are very happy and slowly we start seeing dreams about their future By the time we really understand what is happening they grow and then it becomes more exhausting for us We start doubting ourselves our potential to raise the child We start comparing other parents and children whether they are good or we are on the correct path and doing a fair job Slowly this becomes a habit and we start feeling exhausted with this And all these doubts irritations occur as we do not have any benchmark or manual for the right parenting 1 We will be learning about some areas where we struggle with our children How to deal with it how to cope up and give an excellent environment to our children to grow more and more for betterment 2 We will learn how to see the world from a child's eye 3 What kind of trouble we may face and to understand the psychology behind the behaviors Once we understand this we can easily solve it Parenting it's not there from birth It has to be learnt It is a skill that needs to be learnt It is difficult but not impossible But once we know the tricks we can easily do it by balancing the rest of the things in our lives Parents are the path provider and the mentor to tell children about the right path Parenthood is all about behaving ourselves changing our habits doing good to ourselves and being happy from inside Research says that love is the component that actually develops the brain of a child much faster These children who get a positive happy environment shows ultimate success in life They will be knowing handling failures They will be ready to face any situation with conviction
