Workshop Statistics Allan J. Rossman, Beth L. Chance, Robin H. Lock, 2001-05-18 This book focuses on probability and the Bayesian viewpoint. It presents basic material on probability and then introduces inference by means of Bayes rule. The emphasis is on statistical thinking and how one learns from data. The objective is to present the basic tenets of statistical inference. Unique in its format, the text allows students to discover statistical concepts, explore statistical principles, and apply statistical techniques. In addition to the numerous activities and exercises around which the text is built, the book includes a basic text exposition for each topic and data appendices. Workshop Statistics James H. Albert, Allan J.

Word- and World-Making in South Africa Taylor Riley, 2021-05-03 Focusing on everyday experiences of sexuality in the South African province of KwaZulu Natal, this book considers personal narratives and other queer artefacts to shed light on linguistic and performative strategies of resistance referred to as queer word and world making. Questions of non-normative expressions of gender and sexuality in South Africa refer to the politics of words and to their contested meanings and valuations reflected in the way that they roll off tongues. If sexualities are not merely acts, feelings or identities but embodiments of desires which invoke and influence social contexts, assumptions about sexuality as a realm of situated knowledge cannot be trusted at face value. Taylor Riley considers the meanings coded in words used to depict same sexualities and the productive silences which surround them and how those meanings are embraced, altered and resisted through labors of everyday existence. The volume sheds new light on and personalizes the highly contested meanings which surround queer life and LGBTI rights in South Africa. It will be of interest to scholars and upper level students of anthropology, queer studies and African studies.
