Water and Development The World Bank, 2010-06-30 Development patterns increasing population pressure and the demand for better livelihoods in many parts of the globe all contribute to a steadily deepening global water crisis Development redirects consumes and pollutes water It also causes changes in the state of natural water reservoirs directly by draining aquifers and indirectly by

*Starved for Science* Robert Paarlberg, 2009-06-30 Listen to a short interview with Robert Paarlberg Host Chris Gondek Producer Heron Crane Heading upcountry in Africa to visit small farms is absolutely exhilarating given the dramatic beauty of big skies red soil and arid vistas but eventually the two lane tarmac narrows to rutted dirt and the journey must continue on foot The farmers you eventually meet are mostly women hardworking but visibly poor They have no improved seeds no chemical fertilizers no irrigation and with their meager crops they earn less than a dollar a day Many are malnourished Nearly two thirds of Africans are employed in agriculture yet on a per capita basis they produce roughly 20 percent less than they did in 1970 Although modern agricultural science was the key to reducing rural poverty in Asia modern farm science including biotechnology has recently been kept out of Africa In *Starved for Science* Robert Paarlberg explains why poor African farmers are denied access to productive technologies particularly genetically engineered seeds with improved resistance to insects and drought He traces this obstacle to the current opposition to farm science in prosperous countries Having embraced agricultural science to become well fed themselves those in wealthy countries are now instructing Africans on the most dubious grounds not to do the same In a book sure to generate intense debate Paarlberg details how this cultural turn against agricultural science among affluent societies is now being exported inappropriately to Africa Those who are opposed to the use of agricultural technologies are telling African farmers that in effect it would be just as well for them to remain poor

*Eco-Social Policy in the OECD and the World Bank* Robin Schulze Waltrup, 2025-09-26 This book explores eco social policy and its role in the global governance system By focusing on the eco social policy discourses of the Organisation for Economic Co operation and Development OECD and the World Bank this book provides a comprehensive analysis of how and to what extent these influential international organisations integrate environmental and social concerns and promote an integrated eco social policy perspective While the OECD and the World Bank promote crucial elements of eco social policy integration the book argues that they fall short of pushing toward a social ecological transformation within global governance that profoundly focuses on the decommodification of nature and labour Drawing on different concepts

including Polanyi's notion of the double movement it shows how there are partly contradictory policy perspectives on eco social policy integration in both organisations which eventually stabilise the existing capitalist mode of production albeit with green conditions Through its in depth exploration of the eco social policy discourses of the OECD and the World Bank this book serves as an essential resource for understanding and questioning the scope of sustainable and equitable global policy frameworks for both researchers and practitioners
