## **World History 15 New:**

**The New World History** Ross E. Dunn, Laura J. Mitchell, Kerry Ward, 2016-08-23 The New World History is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field. The forty-four articles in this book take stock of the history, evolving literature, and current trajectories of new world history. These essays, together with the editors' introductions to thematic chapters, encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches, and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers, and today's practitioners; changing concepts of world historical space and time; comparative methods; environmental history; the big history movement; globalization debates over the meaning of Western power; and ongoing questions about the intellectual premises and assumptions that have shaped the field.

**The Colonial World** Robert Aldrich, Andreas Stucki, 2022-12-29 The Colonial World: A History of European Empires 1780s to the Present provides the most authoritative in-depth overview on European imperialism available. It synthesizes recent developments in the study of European empires and provides new perspectives on European colonialism and the challenges to it. With a post-1800 focus and extensive background coverage tracing the subject to the early 1700s, the book charts the rise and eclipse of European empires. Robert Aldrich and Andreas Stucki integrate innovative approaches and findings from the new imperial history and look at both the colonial era and the legacies it left behind for countries around the world after they gained independence. Dividing the text into three complementary sections, Aldrich and Stucki offer an original approach to the subject that allows you to explore different eras of colonisation and decolonisation from early modern European colonialism to the present day. Overarching themes in colonial history like land and sea, the body, and representations of colonialism. A global range of snapshot colonial case studies such as Peru 1780, India 1876, The South Pacific 1903, the Dutch East Indies 1938, and the Portuguese empire in Africa 1971. This is the essential text for anyone seeking to understand the nature and complexities of modern European imperialism and its aftermath.

**South Asian Migrations in Global History** Neilesh Bose, 2020-12-10 This collection explores how South Asian migrations in modern history have shaped key aspects of globalization since the 1830s. Including original research from colonial India, Fiji, Mexico, South Africa, North America, and the Middle East, the essays explore indentured labour and its legacies, law as a site of regulation, and historical biography. Including recent scholarship on the legacy of issues such as consent, sovereignty, and skilled/unskilled labour distinctions from the history of indentured labour migrations, this volume brings together a range of historical changes that can only be understood by studying South Asian migrants within a globalized world system. Centering South Asian migrations as a site of analysis in global history, the contributors offer a lens into the ongoing regulation of labourers after the abolition of slavery that intersect with histories in the Global North and Global South. The use of historical biography showcases experiences from below and showcases a world history outside

### **Why The West Rules - For Now** Ian

Morris,2010-11-04 Why did British boats shoot their way up the Yangzi in 1842 rather than Chinese ones up the Thames Why do Easterners use English more than Europeans speak in Mandarin or Japanese To put it bluntly why does the West rule There are two schools of thought the Long Term Lock In theory suggesting some sort of inevitability and the Short Term Accident theory But both approaches have misunderstood the shape of history Ian Morris presents a startling new theory He explains with flair and authority why the paths of development differed in the East and West and analysing a vicious twist in trajectories just ahead of us predicts when the West s lead will come to an end Here you have three books wrapped into one an exciting novel that happens to be true an entertaining but thorough historical account of everything important that happened to any important people in the last 10 millennia and an educated guess about what will happen in the future Read learn and enjoy Jared Diamond A great work of synthesis and argument drawing together an awesome range of materials and authorities to bring us a fresh sharp reading of East West relationships Andrew Marr

### **Plagues in World History** John

Aberth,2011-01-16 Plagues in World History provides a concise comparative world history of catastrophic infectious diseases including plague smallpox tuberculosis cholera influenza and AIDS Geographically these diseases have spread across the entire globe temporally they stretch from the sixth century to the present John Aberth considers not only the varied impact that disease has had upon human history but also the many ways in which people have been able to influence diseases simply through their cultural attitudes toward them The author argues that the ability of humans to alter disease even without the modern wonders of antibiotic drugs and other medical treatments is an even more crucial lesson to learn now that AIDS swine flu multidrug resistant tuberculosis and other seemingly incurable illnesses have raged worldwide Aberth s comparative analysis of how different societies have responded in the past to disease illuminates what cultural approaches have been and may continue to be most effective in combating the plagues of today

### The Oxford World History of Empire Peter Fibiger Bang,Christopher Alan

Bayly,Walter Scheidel,2021 This is the first world history of empire reaching from the third millennium BCE to the present By combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes

provide unparalleled coverage of imperialism throughout history and across continents from Asia to Europe and from Africa to the Americas Only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history Volume Two The History of Empires tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present Case studies deal with the full range of the historical experience of empire from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay and from ancient Rome and China to the Mughals American settler colonialism and the Soviet Union Forty five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases

**A Global History of Doping in Sport** John Gleaves, Thomas Hunt, 2016-03-22 From turn of the century horseracing to the monolithic anti doping attitudes now supported by sporting organizations the development of anti doping ideology has spread throughout modern sport Yet heretofore few historians have explored the many ways that international sport has responded to doping This book seeks to fill that gap by examining different aspects of sport s global efforts to respond to athletes doping By incorporating cultural political and feminist histories that examine international responses to doping this special issue aims to better articulate the narrative of doping The work starts with the first mention of doping in any sport It examines not only the first efforts to ban doping but also the athletes who sought performance enhancers Focusing on specific framing events authors in this issue examine how history of doping and how it has indelibly marked the sporting landscape The result is a work with both breadth and focus From stories of Japanese swimmers to Italian runners to American jockeys the work spans the range of doping history At the same time the authors remain focused around one single issue the history of doping in sport This book was published as a special issue of the International Journal of the History of Sport

*Documentary, World History, and National Power in the PRC* Gotelind Mueller, 2013-10-30 Documentaries have recently become a favourite format for Chinese state directed media to present an officially sanctioned view of history Indeed this is not confined to Chinese national history In stark contrast to the earlier self centred preoccupation with Chinese history there has been an upsurge in interest in foreign history with a view to illuminating China s role not only in world history but also on the global stage today and in the future This book examines three recent Chinese documentary television series which present the officially sanctioned view of the rise of the modern West the reasons for the end of the Soviet Union and the legitimisation of the present day Chinese government via a specific reading of modern Chinese history to argue for a Chinese rise in the future With a focus on these documentaries Gotelind Mueller discusses how history is presented on screen and explores the function of visual history for memory culture and wider

society Further this book reveals how the presentation of Chinese and foreign history in a global framework impacts on the officially transmitted views on Self and Other and thus provides a keen insight into how the Chinese themselves regard their global rise Documentary World History and National Power in the PRC will be welcomed by students and scholars working across a number of fields including Chinese studies East Asian studies media studies television studies history and memory studies

**Germany in the World: A Global History, 1500-2000** David Blackbourn, 2023-06-06 Brilliantly conceived and majestically written this monumental work of European history recasts the five hundred year history of Germany With Germany in the World award winning historian David Blackbourn radically revises conventional narratives of German history demonstrating the existence of a distinctly German presence in the world centuries before its unification and revealing a national identity far more complicated than previously imagined Blackbourn traces Germany's evolution from the loosely bound Holy Roman Empire of 1500 to a sprawling colonial power to a twenty first century beacon of democracy Viewed through a global lens familiar landmarks of German history the Reformation the Revolution of 1848 the Nazi regime are transformed while others are unearthed and explored as Blackbourn reveals Germany's leading role in creating modern universities and its sinister involvement in slave trade economies A global history for a global age Germany in the World is a bold and original account that upends the idea that a nation's history should be written as though it took place entirely within that nation's borders

*A World History of War Crimes* Michael S. Bryant, 2015-12-17 A World History of War Crimes provides a truly global history of war crimes and the involvement of the legal systems faced with these acts Documenting the long historical arc traced by human efforts to limit warfare from codes of war in antiquity designed to maintain a religiously conceived cosmic order to the gradual use in the modern age of the criminal trial as a means of enforcing universal norms this book provides a comprehensive one volume account of war and the laws that have governed conflict since the dawn of world civilizations Throughout his narrative Michael Bryant locates the origin and evolution of the law of war in the interplay between different cultures While showing that no single philosophical idea underlay the law of war in world history this volume also proves that war in global civilization has rarely been an anarchic free for all Rather from its beginnings warfare has been subject to certain constraints

defined by the unique needs and cosmological understandings of the cultures that produce them Only in late modernity has law assumed its current international humanitarian form The criminalization of war crimes in international courts today is only the most recent development of the ancient theme of constraining when and how war may be fought **Gulf in World**
