Alter, 2019-12-31 The keystone of Christianity is Jesus's physical bodily resurrection Present day scholars can be significantly challenged as they forage through voluminous documents on the resurrection of Jesus The literature measures well over seven thousand sources in English language books alone This makes finding specific sources that are most relevant for specific scholarly purposes an arduous task Even when a specific book is relevant finding the parts of the book that are most relevant to the resurrection rather than other topics often requires additional effort *A Thematic Access Oriented Bibliography of Jesus's Resurrection* addresses these challenges in several ways First the bibliography organizes more than seven thousand English sources into twelve main categories and then thirty four subcategories which are designed to help you find the most relevant literature quickly and efficiently Embedded are pro and con arguments which support efficient access through brief annotations and then annotate the diversity and complexity of the field of religion by including sources that represent a diverse range of views theistic e g Christian Jewish Muslim etc agnostic and nontheistic The objective of this bibliography is to provide convenient access to relevant sources from a variety of perspectives allowing you to browse or find the one source accurately and with ease **A Tale of Two Cities** Charles Dickens, 1919 *The Three Ages of Atlantis* Diego Marin, Ivan Minella, Erik Schievenin, 2013-11-28 Scientific and anthropological evidence for multiple Atlantean empires and the global catastrophes that destroyed them Reveals that there was not one but three Atlantises the first in Antarctica the second in South America and the third in the Mediterranean Examines geological evidence of super floods 15 000 11 600 and 8 700 years ago Shows how these flood dates directly parallel the freezing of Antarctica the migrations of Cro Magnon men and the destruction of Atlantis according to Plato 15 000 years ago the Earth's axis tilted shifting the geographic poles Volcanoes erupted the icecaps melted and the seas rose dramatically Antarctica was enveloped in ice destroying the high civilization of prehistory Atlantis But before the survivors could reestablish what they had lost catastrophe struck again twice Uniting scientific findings with theories on the location of Atlantis the authors reveal that there was not one but three Atlantises the first in Antarctica the second in South America and the third in the Mediterranean Examining paleoclimatology data they show that Antarctica was temperate 15 000 years ago and home to the original Atlantis They explore geological evidence of three worldwide super floods 15 000 11 600 and 8 700 years ago and show how these dates directly parallel the freezing of Antarctica the arrival of Cro Magnon man in Europe and the destruction of Atlantis according to Plato Uncovering the influence of the Atlanteans in Proto Indo European languages and in massive ancient monuments aligned with the stars they show how the civilization founders in all early myths the Pelasgians Danaans Viracocha Aryans and others were part of the Atlantean diaspora and how this migration split into two major movements one to Latin America and the other to Europe and

Manning,2003-05-15 World history has expanded dramatically in recent years primarily as a teaching field and increasingly as a research field Growing numbers of teachers and Ph Ds in history are required to teach the subject They must be current on topics from human evolution to industrial development in Song dynasty China to today s disease patterns and then link these disparate topics into a coherent course Numerous textbooks in print and in preparation summarize the field of world history at an introductory level But good teaching also requires advanced training for teachers and access to a stream of new research from scholars trained as world historians In this book Patrick Manning provides the first comprehensive overview of the academic field of world history He reviews patterns of research and debate and proposes guidelines for study by teachers and by researchers in world history *The Ends of History* Amy Swiffen,Joshua Nichols,2013-05-02 The Ends of History considers how despite the fact that events in the past 20 years have called Francis Fukuyama s infamous announcement of the end of history into question the issue of the end of history is now a matter of renewed interest and debate Two decades ago we were confronted by the end of the Soviet Union and collapse of the geo political divisions that had defined much of the twentieth century From this particular end the end of history was proclaimed But is it still possible to argue that liberal democracy and free market capitalism are the final form of law and mode of production in human history Recent events have called this thesis into question from 9 11 and the War on Terror to the current global economic collapse and looming ecological crises it seems that history is far from over And yet oddly enough the question of the end has returned For example in the often predicted but still uncertain establishment of either a new international American Empire or a new era of International Law and the global resurgence of religion as a dominant source of political identification On the other hand perhaps the end is still yet to come slowly accumulating mustering at the periphery of the geo political landscape and outside the productive sphere Responses taking up these questions range from a return to Universalism political theology Messianism and even the old specter of communism This volume assesses these responses exploring what is at stake in proclaiming the end in the current historical moment Is it a matter of reading the writing on the wall Or is the proclamation itself a political act Furthermore is there a desire for the end In addressing these questions the contributors to The Ends of History confront the various ends that we now live and in so doing they open new lines of sight into the future
