Self-Determination as Voice Natalie Jones,2024-01-18 Self Determination as Voice addresses the relationship between Indigenous peoples participation in international governance and the law of self determination Many states and international organizations have put in place institutional mechanisms for the express purpose of including Indigenous representatives in international policy making and decision making processes as well as in the negotiation and drafting of international legal instruments Indigenous peoples rights have a higher profile in the UN system than ever before This book argues that the establishment and use of mechanisms and policies to enable a certain level of Indigenous peoples participation in international governance has become a widespread practice and perhaps even one that is accepted as law In theory the law of self determination supports this move and it is arguably emerging as a rule of customary international law However ultimately the achievement of the ideal of full and effective participation in a manner that would fulfil Indigenous peoples right to self determination remains deferred *Power and Principle* Joel E. Oestreich,2007-06-26 The UN Secretary General Kofi Annan has instructed all UN specialized agencies and other affiliated organizations to consider how their work might advance the cause of human rights around the world Many of these bodies have taken this call to heart with a wide range of intergovernmental organizations IGOs trying to play a more active role in promoting human welfare Power and Principle is a comparative study of how and why IGOs integrate human rights standards into their development operations It focuses on

the process of policy innovation in three UN related IGOs the UN Children s Fund UNICEF the World Bank and the World Health Organization WHO In his comprehensive analysis Joel E Oestreich uses case studies to demonstrate how their policies have evolved during the past two decades to reflect important human rights considerations Drawing on interviews with dozens of staffers from IGOs Oestreich creates a gripping narrative of the inner workings of these large bureaucracies In each study he describes how the organization first became interested in human rights standards how these standards were adopted as a priority how the organization defined rights in the context of their work and what a rights based approach has meant in practice The book argues that IGOs ought to be seen as capable of meaningful agency in international politics and describes the nature of that agency It concludes with an examination of these organizations and their ethical responsibilities as actors on the world stage

The World Bank and Global Managerialism Jonathan Murphy,2007-11-23 In recent years a great deal of scholarly and popular ink has been spilled on the subject of globalization Relatively few scholars have addressed the political sociology of globalization and specifically the emergence of global class formations and a nascent global governance framework This book is a contribution towards redressing this imbalance The book traces the emergence of the World Bank as a key driver of globalization and as a central source of an evolving form of elite driven transnational governance which the author describes as global managerialism The book argues that the Bank has expanded its sphere of activity far beyond provision of low cost capital for development projects and plays a central role in pursuing global economic and social policy homogenization The World Bank and Global Managerialism features a new theoretical approach to globalization developed through an analytical exposition of the key stages in the institution s growth since its creation at the Bretton Woods conference of 1944 The author details the contemporary Bank s central policy framework which includes the intertwining of public and private initiatives and the extension of global governance into ever wider policy and geographic spheres He also argues that contemporary globalization marks the emergence of a transnational elite straddling the corporate government and civil society sectors The book provides two detailed case studies that demonstrate the practical analytical utility of the theory of global managerialism The theoretical approach provides a robust but flexible framework for understanding contemporary global development It is essential reading for courses in areas such as International Organizations Global Political Economy and Globalization and its Discontents and is also relevant to students of development policy and international economic architecture among others

Sustaining Forests World Bank,2004-05-01 The World Bank s Forests Strategy adopted in

October 2002 charts a path for the Bank's proactive engagement in the sector to help attain the goal of poverty reduction without jeopardizing the environmental values intrinsic to sustainability. This strategy replaces the Bank's 1991 Forestry Strategy and was developed on the basis of the findings of an independent review of the 1991 strategy and a two year consultative process with development partners and stakeholders around the world. The revised strategy, *Sustaining Forests*, is built on three guiding pillars harnessing the potential of forests to reduce poverty, integrating forests into sustainable economic development and protecting global forest values. Recognizing the key role forests play in contributing to the livelihoods of people living in extreme poverty, government and local ownership of forest policies and interventions are emphasized along with the development of appropriate institutions to ensure good governance and the mainstreaming of forests into national development planning. The strategy also aims to support ecologically, socially and economically sound management of production forests by ensuring good management practices through application of safeguard procedures and independent monitoring and certification. Implementation of the strategy will center on building and strengthening partnerships with the private sector, non-governmental organizations and other donor agencies to promote better forest conservation and management at country and global levels.

The Inspection Panel of the World Bank Gudmundur Alfredsson, Rolf Ring, 2002-07-11. With the adoption of extensive human rights standards and their wide acceptance by States and the international community, the time has come to emphasise the implementation of these standards at both national and international levels. International financial institutions and development agencies have a special role to play in this respect, considering the influence and the resources at their disposal. Increasingly, they are acknowledging this duty not only as a service to human rights but more so in recognition of the contribution which human rights and democracy and so by extension good governance and accountability make to political stability and improved economies. This volume is the result of a Workshop on the Inspection Panel which was organised in Lund by the Raoul Wallenberg Institute of Human Rights and Humanitarian Law and co-sponsored by the World Bank. Its purpose is to look for common ground in areas of mutual interest and to offer a substantive collection of ideas which can prove useful for the future work of the Inspection Panel and similar institutions. Such undertakings must include human rights education and training for the officials of national governments and international organisations as well as for the individuals and groups who stand to benefit from the implementation of the international standards and monitoring exercises where independent and impartial experts scrutinise the conduct of national and international actors.

Intergovernmental Organisations and Security Sector Reform David Murray Law, David Law, 2007. Intergovernmental organisations (IGOs) play a crucial role in security sector reform and governance (SSR). In virtually all instances of recent and current SSR programme delivery, IGOs have either led the SSR effort or supported the lead provided by other actors. How this role is played is of vital importance for the prospects of fostering durable security and development in a wide range of countries. This volume looks at a selection of organisations that have been in the forefront of

SSR activity or that have the potential for significantly developing their SSR agendas in the future These IGOs are the Organisation for Economic Cooperation and Development OECD the European Union EU the North Atlantic Treaty Organisation NATO the Organisation for Security and Co operation in Europe OSCE the Council of Europe CoE the Economic Organisation of West African States ECOWAS the World Bank WB and the International Monetary Fund IMF This year s volume is divided into four parts conceptual issues case studies on how IGOs have approached SSR in programme areas that are particularly representative of their overall action case studies on the way various actors primarily but not exclusively IGOs have worked with each other in implementing SSR and supporting its implementation and conclusions drawn from the various case studies as well as policy recommendations for future IGO work in the area of SSR G
