This book explores the history structure and current operations of the World Bank which despite being the largest development organisation and the largest development research body in the world with tremendous direct and indirect influence on developing economies has rarely received the critical attention its importance merits The book s unique contribution is twofold it provides an original analysis of the interaction between economic theory political practice and the Bank s development praxis as well as two detailed grounded studies of the Bank s lending practices The book starts with a detailed examination of the development theory and practice of the World Bank from its Keynesian origins to the current shift through the Washington Consensus to the so called post Washington Consensus The second part is a detailed analysis of the Bank s lending practices in two countries Vietnam and Indonesia The case studies extensively utilise World Bank sources analysing the Project Appraisal Documents for some 113 loans They also draw on the secondary literature and on interviews with World Bank staff government officials academics and NGOs in both countries The case studies enable the development of empirically based conclusions regarding the impact of Bank policies on the economic and social development of two important Southeast Asian nations making possible an assessment of the extent to which the rhetoric of the post Washington Consensus has been incorporated into the Bank s lending practices This book will be of interest to both advanced undergraduate and graduate students as well as specialist audiences in the fields of international political economy development international organizations and Southeast Asian Studies *Poverty Reduction and the World Bank* , 2000-01-01

Improvements in social indicators have been substantial over the past 25 years but they have not been the same for those at the top and bottom of the distribution In fact the social indicators for those at the bottom have worsened in some cases substantially This annual publication reports on World Bank activities in fiscal year 1999 and provides an overview of what the Bank is doing to help countries face the challenge of reducing poverty It also looks at the future of Bank assistance at the national global and community levels Action on these three fronts represents the beginnings of a new strategic direction to be formulated in an implementation note after discussion of the World Development Report 2000 2001 on poverty is complete This new strategic direction includes a major program of knowledge sharing dissemination training and informed debate centered around the World Development Report and the Poverty Reduction Strategy Sourcebook **World Bank Literature** Amitava Kumar, 2003 World Bank literature is more than a concept it is a provocation a call to arms It is intended to prompt questions about each word to probe globalization political economy and the role of literary and cultural studies As asserted in this major work it signals a radical rewriting of academic debates a rigorous analysis of the World Bank and the International Monetary Fund IMF and a consideration of literature that deals with new global realities Made more relevant

than ever by momentous antiglobalization demonstrations in Seattle and Genoa World Bank Literature brings together essays by a distinguished group of economists cultural and literary critics social scientists and public policy analysts to ask how to understand the influence of the World Bank IMF on global economic power relations and cultural production The authors attack this question in myriad ways examining World Bank IMF documents as literature their impact on developing nations the relationship between literature and globalization the connection between the academy and the global economy and the emergence of coalitions confronting the new power World Bank Literature shows above all the multifarious and sometimes nefarious ways that abstract academic debates play themselves out concretely in social policy and cultural mores that reinforce traditional power structures

Eliminating Human Poverty Santosh Mehrotra, Enrique Delamonica, 2013-07-04 This book focuses on the provision of basic social services in particular access to education health and water supplies as the central building blocks of any human development strategy The authors concentrate on how these basic social services can be financed and delivered more effectively to achieve the internationally agreed Millennium Development Goals Their analysis which departs from the dominant macro economic paradigm deploys the results of broad ranging research they led at UNICEF and UNDP investigating the record on basic social services of some 30 developing countries In seeking to learn from these new data they develop an analytical argument around two potential synergies at the macro level between poverty reduction human development and economic growth and at the micro level between interventions to provide basic social services Policymakers they argue can integrate macro economic and social policy Fiscal monetary and other macro economic policies can be compatible with social sector requirements They make the case that policymakers have more flexibility than is

usually presented by orthodox writers and international financial institutions and that if policymakers engaged in alternative macro economic and growth oriented policies this could lead to the expansion of human capabilities and the fulfillment of human rights This book explores some of these policy options The book also argues that more than just additional aid is needed Specific strategic shifts in the areas of aid policy decentralized governance health and education policy and the private public mix in service provision are a prerequisite to achieve the goals of human development The combination of governance reforms and fiscal and macro economic policies outlined in this book can eliminate human poverty in the span of a generation
