**Fighting Fraud and Corruption at the World Bank** Stefano Manacorda,Costantino Grasso,2018-05-04 This book focuses on the World Bank s sanctions system which is an innovative instrument of global governance implemented by the leading multilateral development bank in order to impose penalties on legal entities and individuals that are involved in Bank financed projects Although similar regimes have also been implemented by other regional multilateral development banks the World Bank s legal framework is currently the most comprehensive one The book offers a rich and detailed analysis of the sanctions system presenting an in depth examination of all the phases of its procedure with a special focus on key aspects such as the criteria for assigning liability to legal entities and corporate groups as well as the World Bank s jurisdictional reach over non contractors The book also explores the compatibility between the legal framework implemented by the Bank and the rule of law the role of precedents and the level of due process It highlights the fact that the sanctions system is currently characterized by a lack of legal guarantees and that there are compelling reasons for supporting the argument that due process safeguards should be applied to it in their entirety To that end the book conducts a thorough analysis of specific procedural aspects such as the right to a hearing the right to evidence disclosure the time limit regime the standard of proof and shift of the burden of proof the evidential value of a party s silence and the consistency and predictability of the World Bank s sentencing practice The study is conducted on the basis of a detailed and painstaking examination of the most relevant decisions taken by the Sanctions Board providing the first ever commentary on the World Bank s case law

Boulton,Terry D. Nixon,2023-11-10 Prior research attributes negative stock market performance following episodes of social unrest to elevated uncertainty However social unrest does not solely increase uncertainty but separately acts to decrease investor sentiment To determine which effect dominates we study initial public offering IPO underpricing which responds differently to changes to uncertainty and investor sentiment Consistent with the notion that social unrest dampens investor sentiment we find robust evidence that IPO first day returns are lower during times of greater social unrest Limits to arbitrage intensify the negative relation between social unrest and underpricing Notably strong institutional frameworks mitigate the impact of social unrest on underpricing suggesting that quality institutions weaken the link between investor sentiment and returns *Gender Equality: Which Policies Have the Biggest Bang for the Buck?*

Ms.Sonali Jain-Chandra,Ms.Kalpna Kochhar,Ms.Monique Newiak,Yang Yang,Ms.Edda Zoli,2018-05-10 This paper analyzes the relationship between fiscal and structural policies and gender inequality in education and labor force participation for countries at different stages of development Due to the substantial number of possible factors that link with gender inequality previously highlighted in the literature we pay particular attention to addressing model uncertainty and using various statistical methods to find the variables with the strongest links to gender gaps We find that higher public spending on education better sanitation facilities low adolescent fertility and narrower marriage age gaps are significantly related to narrower gender gaps in education We also find that better infrastructure a stronger institutional environment more equal legal rights and low adolescent fertility rates are strongly associated with higher female labor force participation When labor market protection is low an increase in protection is associated with a narrowing of labor force participation gaps between men and women But when labor market protection levels are high an increase in protection is associated with a widening in labor force participation gaps
