scholarship in this field is often career oriented and geared either toward the search for immediately usable knowledge or guidelines and prescriptions for the future. Although most administrative scientists would acknowledge that their field has a history, their time horizon is limited to the recent past. Raadschelders demonstrates that public administration has in fact a long standing tradition both in practice and in writing. Administration has been an issue ever since human beings recognized the need to organize themselves in order to organize the environment in which they lived. This history in turn underlines the need for administrators to be aware of the importance and contemporary impact of past decisions and old traditions. In seeking to go beyond the usual problem solving and future oriented studies of public administration, this volume adds greatly to the cognitive richness of this field of research. Indeed, the search for theoretical generalizations will profit from an approach that unravels long term trends in the development of administration and government. Raadschelders approaches public administration history from a dual perspective as trained historian and professor of public administration. The volume is appropriately called a handbook in view of its methodical listing of the literature on administrative history together with summaries of numerous authors' principal theories. The second chapter is an essay on sources in the field including an extended bibliography. These parts of the book alone make it useful to scholars in the field. Raadschelders is helpful in other ways as well. The third and fourth chapters offer a highly sophisticated discussion of methodological problems encountered in writing administrative history, including the issue of perceiving stage.

United Nations Peacekeeping in Africa Since 1960 Norrie MacQueen, 2014-07-30. United Nations Peacekeeping in Africa provides an exploration of United Nations military intervention in Africa from its beginnings in the Congo in 1960 to the new operations of the twenty first century. The scene is set by an examination of the theoretical bases both of United Nations peacekeeping and of Africa's post independence politics and international relations. The peacekeeping project in Africa is then described on a region by region basis: Central Africa, Southern Africa, West Africa, the Horn and Trans Saharan Africa, with comparisons and contrasts within and between each part of Africa highlighted throughout. A number of key questions are considered: how have developments in the broader international system affected conflicts in Africa? what are the internal and external forces which have caused African states to fail and collapse? how have external powers used UN Peacekeeping in pursuit of their own political agendas? what determines success and failure in African peacekeeping? are there African solutions to African problems which could supplant UN involvement? As well as providing an account of UN involvement, the book is concerned to explore the long historical origins of the African conflicts with which the UN has been engaged. Written in an engaging and accessible manner, *United Nations Peacekeeping in Africa* provides an invaluable examination of the complex issues surrounding UN interventions in Africa.
