Worlds On Fire:

World Fire Stephen J. Pyne, 2014-07-01 Back in Print World Fire is the story of how fire and humans have coevolved The two are inseparable and together they have repeatedly remade the planet Pyne considers the evolution of fire in such diverse regions as Australia Africa Brazil Sweden Greece Iberia Russia and India and then ponders Antarctica the land without fire As he examines changing techniques for and attitudes toward fire control Pyne challenges our concepts of nature and wilderness and explains why the study and management of fire have tremendous environmental cultural and political implications Booklist A sweeping historical treatise that examines our world's love hate relationship with conflagration His engrossing ideas leave bright embers in the memory Outside

The Origins of the World's Mythologies E.J. Michael Witzel, 2012-12-13 This remarkable book is the most ambitious work on mythology since that of the renowned Mircea Eliade who all but single handedly invented the modern study of myth and religion Focusing on the oldest available texts buttressed by data from archeology comparative linguistics and human population genetics Michael Witzel reconstructs a single original African source for our collective myths dating back some 100 000 years Identifying features shared by this Out of Africa mythology and its northern Eurasian offshoots Witzel suggests that these common myths recounted by the communities of the African Eve are the earliest evidence of ancient spirituality Moreover these common features Witzel shows survive today in all major religions Witzel's book is an intellectual hand grenade that will doubtless generate considerable excitement and consternation in the scholarly community Indeed everyone interested in mythology will want to grapple with Witzel's extraordinary hypothesis about the spirituality of our common ancestors and to understand what it tells us about our modern cultures and the way they are linked at the deepest level
