Halkitis, 2014 The AIDS Generation documents the lived experiences of HIV positive gay men who are presently middle aged long term survivors of HIV AIDS Through the use of ethnography and life history interviews the book delineates the resiliencies that these fifteen long term survivors have demonstrated in coping with a life threatening disease throughout the course of their adult lives

The AIDS Generation Perry N. Halkitis, 2013-10-15 For young gay men who came of age in the United States in the 1980s the HIV AIDS epidemic was a formative experience in fear hardship and loss Those who were diagnosed before 1996 suffered an exceptionally high rate of mortality and the survivors both the infected individuals and those close to them today constitute a bravest generation in American history The AIDS Generation Stories of Survival and Resilience examines the strategies for survival and coping employed by these HIV positive gay men who together constitute the first generation of long term survivors of the disease Through interviews conducted by the author it narrates the stories of gay men who have survived since the early days of the epidemic documents and delineates the strategies and behaviors enacted by men of this generation to survive it and examines the extent to which these approaches to survival inform and are informed by the broad body of literature on resilience and health The stories and strategies detailed here all used to combat the profound physical emotional and social challenges faced by those in the crosshairs of the AIDS epidemic provide a gateway for understanding how individuals cope with chronic and life threatening diseases Halkitis takes readers on a journey of first hand data collection the interviews themselves the popular culture representations of these phenomena and his own experiences as one of the men of the AIDS generation This riveting account will be of interest to health practitioners and historians throughout the clinical and social sciences or to anyone with an interest in this important chapter in social history Cover photo courtesy of Fire Island Pines Historical Preservation Society

The Corona Generation Jennie Bristow, Emma Gilland, 2020-11-27 One of the UK's leading sociologists of generation uses both her scholarship and her ability to write beautifully to give meaning to the experience of Spring and Summer 2020 Professor Ellie Lee Director of the Centre for Parenting Culture Studies University of Kent It is already clear that the COVID 19 crisis will have huge social and economic implications The Corona Generation considers its effect on the generation currently coming of age the demographic currently known as Generation Z A generation that was already considered to be teetering on the brink of an uncertain political economic and environmental future now finds itself

entering an adulthood in which nothing can be taken for granted where continuous crisis management is already presented as the new normal

Aging Invisibly, 2024-09-16 Statistical data suggest that many people with chronic health conditions pass away at much younger ages than their peers Yet large quantitative datasets that address aging with chronic illness often do not capture the diversity of people with chronic diseases and their experiences of growing older The assumptions built into many core data resources on aging often erase the journeys of people occupying marginalized social locations Likewise these same assumptions can result in omission of people who survive for long amounts of time while managing conditions with relatively short median life expectancies These barriers to understanding diverse experiences of aging with chronic illness are endemic but not unique to quantitative research Qualitative data collection can indeed offer richer insight into both of these intersecting sets of aging experiences However even more in depth approaches to inquiry with smaller groups of people require asking questions that explicitly explore and affirm the diversity of identities and health statuses held by older adults A more constructive and impactful approach to capturing meaningful data on diverse experiences of aging with chronic disease is thus to focus on affirming study architecture rather than viewing one particular set of methods as a panacea for exclusion With this new edited volume the editors support the broader goal of expanding knowledge on diverse trajectories of aging with chronic health conditions Contributed chapters range from critical reviews to methods primers to empirical investigations The authors focus synergistically on amplifying the attributes and experiences of diverse social populations and on highlighting journeys of longevity with chronic disease Contributors are Nicholas B DiCarlo Angela Hunt Ian M Johnson Nat Jones Kristen D Krause Nik M Lampe Ginny Natale Audria LB Kirsten Ostergren Clark Manacy Pai Michele Wise Wright and Terry Gene Wright

History and Hope in American Literature

Benjamin Railton, 2016-11-10 Throughout history creative writers have often tackled topical subjects as a means to engage and influence public discourse American authors those born in the States and those who became naturalized citizens have consistently found ways to be critical of the more painful pieces of the country s past yet have done so with the patriotic purpose of strengthening the nation s community and future In History and Hope in American Literature Models of Critical Patriotism Ben Railton argues that it is only through an in depth engagement with history especially its darkest and most agonizing elements that one can come to a genuine form of patriotism that employs constructive criticism as a tool for civic engagement The author argues that it is through such critical patriotism that one can imagine and move toward a hopeful shared future for all Americans Railton highlights twelve works of American literature that focus on troubling periods in American history including John Steinbeck s The Grapes of Wrath David Bradley s The Chaneysville Incident Louise Erdrich s Love Medicine Tony Kushner s Angels in America Junot Diaz s The Brief Wondrous Life of Oscar Wao and Dave Eggers s What Is the What From African and Native American histories to the Depression and the AIDS epidemic Caribbean and Rwandan refugees and immigrants to global climate change these works help readers confront understand and transcend the most sorrowful histories and issues In so doing the authors of these books offer hard won hope that can help point people in the direction of a more perfect union History and Hope in American Literature will be of interest to students and practitioners of American literature and history

The Unfinished Queer Agenda After Marriage Equality Angela Jones, Joseph DeFilippis, Michael Yarbrough, 2018-04-17 While legal recognition of marriage has met the needs of a segment

of the LGBTQ population many still face daily struggles with issues around housing education healthcare policing and incarceration and immigration These are issues that were largely eclipsed in national arenas by the fight for marriage equality In reaction to this *The Unfinished Queer Agenda After Marriage Equality* examines the institutional failings and overlapping systems of injustice that continue to dehumanize queer and trans people and deprive them of basic human rights Building on a major conference held in 2016 entitled *After Marriage The Future of LGBTQ Politics and Scholarship* the editors have collected academic papers edited transcripts of selected conference sessions and interviews with activists Drawing from this source material the book argues that any queer agenda should be informed by an understanding that the issues facing queer and trans people come from the combined influence of neo liberal capitalism global white supremacy and heterosexism The authors argue that these modes of oppression continue to be especially damaging for poor people undocumented people people of color non binary trans and queer people By taking an in depth look at the myriad social issues that continue to affect LGBTQ communities and by exposing systemic prejudices and inequality as the root cause this title is an important intervention for students and researchers engaged with queer and trans activism beyond the fight for marriage equality
