The American Steam Locomotive in the Twentieth Century Tom Morrison,2018-07-24 Between 1900 and 1950 Americans built the most powerful steam locomotives of all time enormous engines that powered a colossal industry They were deceptively simple machines yet the more their technology was studied the more obscure it became Despite immense and sustained engineering efforts steam locomotives remained grossly inefficient in their use of increasingly costly fuel and labor In the end they baffled their masters and as soon as diesel electric technology provided an alternative steam locomotives disappeared from American railroads Drawing on the work of eminent engineers and railroad managers of the day this lavishly illustrated history chronicles the challenges triumphs and failures of American steam locomotive development and operation

Motor Age ,1916 *Oral Health* ,1915 *Gresley's Silver Link* Tim Hillier-Graves,Ronald Hillier,2023-03-23 Gresley s A4 Pacifics are arguably the most famous locomotives ever built a status cemented by Mallard s record breaking run on the 3rd July 38 And yet only a year later the glamorous streaks seemed likely to be cast into obscurity by the coming of another world war So for only four exhilarating years they were allowed to flourish as their creator had intended and in that time captured the imagination of railwaymen and public alike With the help of previously unpublished material the author analyses the complex evolution of the A4s a project that began in 1911 when Gresley was appointed as Locomotive Superintendent of the Great Northern Railway It is a story with many strands to consider war peace and war again engineering and art politics and business recession and social change the growth of the media and consumerism the struggle for professional reputations and a growing deeply damaging international rivalry All these elements are captured in the story of the A4s in the heady days before conflict ended their brief golden age and Gresley s life came to an end
