Libraries as such respond to this desire by collecting storing and circulating resources books and other kinds of media But more recently there has been an emphasis on the public character of library spaces in which people gather not only to obtain information and read by themselves but also to experience the very urban quality of proximity to others in more informal and less structured environments as public space Community events characterize the programming of all the libraries included in the book The design of these new libraries fit into urban development initiatives where libraries like other iconic cultural spaces of cities become central components to market cities for the consumption of culture Libraries become sites to be visited and explored by tourists while providing services for residents They are also machines to accelerate urban development especially in areas previously neglected by development

Trampier,2014-03-12 Different ideas of what constitutes an archaeological site have developed over two centuries of scholarship and heritage law in Egypt with sites often unconsciously conceived as lands with museum quality pieces and striking monumental mortuary and or epigraphic remains As a result the material record of the powerful dominates Egyptological discourse leaving hundreds of unexplored sites in the Delta floodplain and their potential contributions to a narrative of Egyptian culture largely ignored Attempting to correct this the author integrates historical maps remote sensing data and ancient texts to understand the dynamic landscape of the western Nile Delta Weaving together new archaeological survey Corona satellite images and a targeted program of drill coring this volume offers a palimpsest of settlement and paleoenvironment from the New Kingdom to Late Roman era In the face of forces undermining many sites integrity this study adapts techniques in landscape archaeology to an Egyptian context anticipating triage and salvage in the decades to come
