The Natural Medicine Guide to Addiction Stephanie Marohn, 2025-09-12 Medical journalist Stephanie Marohn eases the pain and trauma of addiction recovery in this guide, one in a series dealing with ailments such as anxiety and depression. In layman's terms, she discusses how chemical imbalances in the brain create addiction and withdrawal symptoms and how they can be restored. Suggestions include amino acid supplements to regulate sugar levels, herbs such as chamomile, valerian root to relax the nervous system, acupuncture, aromatherapy, candle therapy and so on. Marohn's view of addiction is clear enough to see the big picture, which encompasses everything from crippling drug addiction to minor, apparently harmless habits such as compulsive shopping. According to Marohn, addiction is a problem that affects over 100 million people every year and needn't be seen as either freakish or a sign of weakness. Furthermore, there is a way to recover that does not compromise a holistic lifestyle through pharmaceutical medicines; should one choose this path.

Aromadermatology Janetta Bensouilah, Philippa Buck, 2021-07-28 This comprehensive evidence-based guide promotes an integrative approach to using complementary therapies with conventional medicines. It increases awareness of the sound scientific basis to aromatherapy with a wealth of data and contains practical information for treatment. Contents include: Skin structure and function, Essential oil sciences in context, Aromadermatology and safety issues, The essentials of aromatic formulations, Skin care essentials, Skin and the psyche, Skin infections, Childhood skin complaints, Inflammatory disorders, Wound care, Nails, hair and sebaceous glands. With the growing interest in aromatherapy, it is important that therapists and healthcare professionals are able to offer a valid rationale when integrating essential oils into clinical care. Sound knowledge of biochemical principles and the ability to critically appraise and apply relevant research are fundamental requirements. This book offers a comprehensive in-depth view of current knowledge. The authors have skilfully woven research and clinical application. A range of therapeutic possibilities is explored and offers practitioners alternative approaches to the management of skin conditions. These include detailed discussions on different methods of application. I hope that this book will become a standard text on both pre-qualifying and CPD courses in aromatherapy. Angela Avis in her Foreword. This well-illustrated, thorough and authoritative text is written in a language and style that is clear and accessible to a variety of healthcare practitioners. A thorough understanding of dermatology underpins the book, and both current research and clinical knowledge are elegantly applied to the skin conditions discussed. Robert Tisserand in his Foreword.
