World History Teaching in Asia Shingo Minamizuka, 2019-03-30 *World History Teaching in Asia* is the first broad survey of the content and approaches used to teach world history in secondary schools and colleges in Asia. The collection has been crafted by scholars and educators whose goal was to shed light on the importance of history education and to foster understanding of and between Asian countries. These essays show how the teaching of world history in Asian countries has developed since World War II with many interesting parallels including the issue of Eurocentrism but also distinctive national trends and considerable changes over time. At a time when many Asian countries are making great strides in education, this study of history education in Asia will be of real interest to educators, history scholars, and policy makers worldwide.

They sound increasingly realistic. This volume addresses this issue by mapping and analyzing the forms, mechanisms, strategies, and effects in the past, the present, and the future of Western hegemonies, namely asymmetrical relations that bring advantages or at least secure the superiority of Western state and non-state actors in politics, economics, and culture broadly understood. Over the past decades and centuries, Westerners never ceased claiming supremacy in all these spheres. A host of these relations were initiated through colonialism and imperialism and perpetuated through informal imperialism, but there are other channels: political interference, inequalities between countries, and attempts at affirming the supremacy of the so-called Western way of life were also secured through the military might and economic power of great

Western actors This book explores sites of Western hegemonies and contributes to understanding the mechanisms through which international hierarchies are formed and maintained Bringing together the research of scholars from various fields in the humanities and social sciences political science international relations political philosophy sociology history postcolonial studies criminology and linguistics this volume develops a multidisciplinary outlook on the issue of Western hegemonies that allows uncovering resemblances between various forms of asymmetrical relations and their mechanisms

State Continuity and Nationality: The Baltic States and Russia Ineta Ziemele, 2025-09-01 Political changes in Central and Eastern Europe in the 1990s led to important territorial changes and confronted decision makers and international lawyers with complex questions relevant to State continuity and succession The case of the Baltic States was particularly difficult since they re emerged after half a century of Soviet occupation In addition to questions on the status of new States important issues arose with regard to the fate of nationals of the former federations generating frantic international efforts in developing and consolidating available rules and principles on nationality in situations of territorial change In this context the Baltic case stood apart It raised questions of non recognition of consequences of their illegal occupation in international law but that was not the way the issues were dealt with The book documents and examines the story of the Soviet occupation of the Baltic States in 1940 and their claim to State continuity fifty years later It brings in the issue of the obligations of Russia in this context The book asks the question what nationality solutions had to be adopted in the region and shows the scrutiny they received from international institutions This second edition of the book revisits decisions that were taken in the 1990s and asks whether they have withstood the test of time The case of the Baltic States is an example of the strength of international law rules when applied with courage and of the risks when too many compromises with rules and principles are accepted Although the book is specific in its coverage it is of general importance because it draws conclusions concerning developments in law and practice which are relevant for a better understanding and regulation of statehood and nationality in international law
