Exploring the World of Chemistry John Hudson Tiner,2001-09-01 Chemistry is an amazing branch of science that affects us every day yet few people realize it or even give it much thought Without chemistry there would be nothing made of plastic there would be no rubber tires no tin cans no television no microwave ovens or something as simple as wax paper This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries and discoverers Find out why pure gold is not used for jewelry or coins Join Humphry Davy as he made many chemical discoveries and learn how they shortened his life See how people in the 1870s could jump over the top of the Washington Monument Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations biographical information chapter tests and an index for easy referencing The World of Science Education ,2010-01-01 Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel Arab States and Sub Saharan Africa The focus of this Handbook is on science education in Asia and the scholarship that most closely supports this program The reviews of the research situate what has been accomplished within a given field in an Asian rather than an international context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts The approach allows readers to review what has been done and accomplished what is missing and what might be done next **World of Chemistry** Melvin D. Joesten,1996-01 **World of Chemistry: Student Textbook** ,2013 **World of Chemistry** Joesten,2011 **The World of Materials** Robert A. Wesolowski,Anthony P. Wesolowski,Roumiana S. Petrova,2020-06-08 The world of materials is exciting because new materials are evolving daily After an introduction to materials science the book addresses the classification and structure of matter It moves on to discuss crystal and mechanical properties Next the book employs various materials such as semiconductors and iron wires to teach concepts such as electrical conductivity heat conductivity and allotropes Corrosion is addressed and a chapter dedicated to interpretation of graphs and diagrams in materials science is presented The book then progresses with chapters on ceramics biomaterials polymers and composites To address the growing importance of recycling materials polymer identification codes are explained Interesting topics such as accidental

materials discovery and materials failure are included Each chapter ends with a chapter summary and questions and answers Illustrations and worked examples are provided throughout A lab manual is included as well Presents an broad overview of materials science topics including such topics as crystal and mechanical properties of materials semiconductors and iron wires corrosion ceramics biomaterials polymers and composite materials Examines modern day materials their synthesis properties alteration and applications Includes supplemental material such as a lab manual and examples

From the Molecular World Alan J. Rocke, 2012-01-21 Hermann Kopp 1817 1892 is best remembered today as a historian of chemistry but during his lifetime he was one of the most eminent chemists of his day and one of the earliest pioneers of physical chemistry Late in his career he wrote an endearing fantasy about personified molecules Published in 1882 *Aus der Molecular Welt* *From the Molecular World* portrayed the intimate details of what might actually be happening in the sub microscopic world the atoms and molecules we meet there have agency personalities sometimes even dialog Filled with appealing tropes humor and whimsical asides Kopp's short book provided an examination of the chemistry and physics of his day that was always light hearted on the surface but often surprisingly profound Properly interpreted the book provides a revealing tour of nineteenth century debates concerning chemical theory It is here translated into English richly annotated and equipped with an illuminating preface by a leading historian of chemistry It provides entertaining reading to practicing chemists as well as new insights to historians of science

The Shared World Axel Seemann, 2019-05-07 A novel treatment of the capacity for shared attention joint action and perceptual common knowledge In *The Shared World* Axel Seemann offers a new treatment of the capacity to perceive act on and know about the world together with others Seemann argues that creatures capable of joint attention stand in a unique perceptual and epistemic relation to their surroundings they operate in an environment that they through their communication with their fellow perceivers help constitute Seemann shows that this relation can be marshaled to address a range of questions about the social aspect of the mind and its perceptual and cognitive capacities Seemann begins with a conceptual question about a complex kind of sociocognitive phenomenon perceptual common knowledge and develops an empirically informed account of the spatial structure of the environment in and about which such knowledge is possible In the course of his argument he addresses such topics as demonstrative reference in communication common knowledge about jointly perceived objects and spatial awareness in joint perception and action
