GEOGRAPHY

How does geography affect how a civilization develops?

The people who study history are also the people who write about history. They piece together the information they find in order to understand people from the past. Their field of study is called **historiography**.

Social scientists also use geography to study history. The book *Guns, Germs, and Steel* looks at how geography helped and hurt civilizations in the past. Jared Diamond, the book's author, explained the three factors that helped Eurasian civilizations succeed: good temperatures and locations for agriculture, resistance to certain deadly germs, and the ability to develop technology.

Where a group of people settle can affect how, when, and in what way they

develop. The island nation of Japan was very isolated from the West before the mid-1800s. By the early 1900s, Japanese people were trading with the West and the country was considered a world power. Great Britain, also an island nation, developed much earlier. Britain was part of the Roman Empire. It later joined other European countries to start colonies around the world. The British had to develop a strong navy in order to protect its own empire around the globe.

1. Why did Japan develop later than Great Britain?

Universal's Guide to LL.B. Entrance Examination Manish Arora, **The Emergence of Subjectivity in the Ancient and Medieval World** Jon Stewart, 2020-03-24 The Emergence of Subjectivity in the Ancient and Medieval World An Interpretation of Western Civilization represents a combination of different genres cultural history philosophical anthropology and textbook It follows a handful of different but interrelated themes through more than a dozen texts that were written over a period of several millennia and by means of an analysis of these texts presents a theory of the development of Western civilization from antiquity to the Middle Ages The main line of argument traces the various self conceptions of different cultures as they developed historically reflecting different views of what it is to be human The thesis of the volume is that through examination of these changes we can discern the gradual emergence of what we today call inwardness subjectivity and individual freedom As human civilization took its first tenuous steps it had a very limited conception of the individual Instead the dominant principle was that of the wider group the family clan or people Only in the course of history did the idea of what we now know as individuality begin to emerge and it took millennia for this idea to be

fully recognized and developed The conception of human beings as having a sphere of inwardness and subjectivity subsequently had a sweeping impact on all aspects of culture including philosophy religion law and art indeed this notion largely constitutes what is today referred to as modernity It is easy to lose sight of the fact that this modern conception of human subjectivity was not simply something given but rather the result of a long process of historical and cultural development
