Hillis Miller, 2016-12-16 Ranjan Ghosh and J Hillis Miller two thinkers from different continents cultures training and critical perspectives debate and reflect upon what literature is can be and do in variety of contexts ranging from Victorian literature and Chinese literary criticism to Sanskrit Poetics and Continental philosophy      Research in Education ,1971      **World Literature Today** ,1977      Shakespeare's Grammatical Style Dolores M. Burton, 2014-11-06 Shakespeare s Grammatical Style is the first full scale systematic study using an examination of Shakespeare s syntax as a key to the interpretation of his work Dolores M Burton presents information on the application of linguistic and statistical techniques to the description and analysis of style and she has applied the insights and techniques of the major schools of linguistic inquiry including those of London and Prague Just as studies of imagery and vocabulary

have aided interpretations of the plays so an examination of the grammatical features of Shakespeare's language indicates that they too perform a poetic and dramatic function. For example, noun modifiers like possessives and definite articles yield insights into a speaker's point of view or subtly aid in defining the fictional world of the plays. With respect to stylistic development, Shakespeare's handling of word order moved from a concentration of dislocated sentences and clause constituents to greater emphasis on varied and frequent permutations in nominal and verbal phrases. A computer-generated concordance of function words facilitated the study of syntactic features which included an examination of formal aspects of diction, nominal group structure, the function and frequency of relative clauses, and the classification of sentences by mood and type. Several problems associated with quantitative and linguistic studies of a full-length literary work are discussed and exemplified. Style itself is defined mathematically as a propositional function  $S(A)$  and from this definition stylistic parameters are derived by correlating critical notions like fictional world, point of view, and characterization with differences in the syntax of the two plays.

**Rise of the Self-Replicators** Tim Taylor, Alan Dorin, 2020-07-30. Is it possible to design robots and other machines that can reproduce and evolve? And if so, what are the implications for the machines for ourselves, for our environment, and for the future of life on Earth and elsewhere? In this book, the authors provide a chronological survey and comprehensive archive of the early history of thought about machine self-reproduction and evolution. They discuss contributions from philosophy, science fiction, science, and engineering and uncover many examples that have never been discussed in the Artificial Intelligence and Artificial Life literature before now. In the final chapter, they provide a synthesis of the concepts discussed, offer their views on the field's future directions, and call for a broad community discussion about the significant implications of intelligent evolving machines. The book will be of interest to general readers and a valuable resource for researchers, practitioners, and historians engaged with ideas in artificial intelligence, artificial life, robotics, and evolutionary computing.

**Global Milton and Visual Art** Angelica Duran, Mario Murgia, 2021-03-18. *Global Milton and Visual Art* showcases the aesthetic appropriation and reinterpretation of the works and legend of the early modern English poet and politician John Milton in diverse eras, regions, and media: book illustrations, cinema, digital reworkings, monuments, painting, sculpture, shieldry, and stained glass. The fifteen purposefully brief chapters, 103 illustrations, and 64 supplemental web images reflect the great richness of the topics and the diverse experiences and expertise of the contributors. Part I, Panoramas, provides overviews and key contexts. Part II, Cameos, offers different perspectives of the varied afterlives of the most widely circulating illustrations of *Paradise Lost*, those by Gustave Doré. Part III, Textual Close-ups, focuses on a rich variety of book illustrations from centuries-old elite engravings to a twenty-first-century graphic novel. Part IV, A Prospect beyond Books, explores visual media outside of books that manifest powerful connections, direct and indirect, with Milton's works and legend.
