British Books in Print, 1985      **Lightweight and Sustainable Materials for Automotive Applications** Omar Faruk, Jimi Tjong, Mohini Sain, 2017-06-01 Automotive manufacturers are required to decrease CO<sub>2</sub> emissions and increase fuel economy while assuring driver comfort and safety. In recent years, there has been rapid development in the application of lightweight and sustainable materials in the automotive industry to help meet these criteria. This book provides critical reviews and the latest research results of various lightweight and sustainable materials in automotive applications. It discusses current applications and future trends of lightweight materials in the automotive area. While there are a few books published mainly focusing on automotive applications of metallic lightweight materials, to date there is no available book focusing on a broad spectrum of lightweight materials including metal plastic composites, bio fiber, bio polymer, carbon fiber, glass fiber, nanomaterials, rubber materials, and foaming materials, as this work does. The book also includes case studies of commercial lightweight automotive parts from sustainable lightweight materials, providing an invaluable resource to those involved in this in-demand research and commercialization area.

Special Use Vehicles George W. Green, 2007-01-23 Beyond the traditional purposes of moving people, goods, raw materials, and mail from place to place, lies a world of unconventional uses of motor vehicles. Rolling grocery stores, churches, classrooms, and health clinics have taken traditionally stationary services directly to those who need them. Companies have built vehicles in the shapes of their products, the Oscar Mayer Wienermobile being just one famous example from the early years of automobiles. This lively history gives a fascinating overview of the many special purposes vehicles have served. The unconventional uses of motor vehicles stretch one's imagination. The author here divides them into eight types based on their purposes and uses: Sales vehicles support a successful sales volume; advertising vehicles retain present customers and attract new ones; education and training vehicles provide skills updates for employees; charity vehicles are used to serve various populations of the needy, suffering, and distressed; religious vehicles promote a particular faith; functional vehicles perform an on-the-spot function normally done by a fixed base facility; multimodal vehicles have the ability to traverse land, water, and air; and government vehicles provide a host of services to constituencies. Examples are provided for each type of vehicle, and examples from other nations besides the United States are included as well.
