Exploring Big Historical Data: The Historian's Macroscopic (Second Edition)

Shawn Graham, Ian Milligan, Scott B Weingart, Kimberley Martin, 2022-02-24 Every day more and more kinds of historical data become available opening exciting new avenues of inquiry but also new challenges This updated and expanded book describes and demonstrates the ways these data can be explored to construct cultural heritage knowledge for research and in teaching and learning It helps humanities scholars to grasp Big Data in order to do their work whether that means understanding the underlying algorithms at work in search engines or designing and using their own tools to process large amounts of information Demonstrating what digital tools have to offer and also what digital does to how we understand the past the authors introduce the many different tools and developing approaches in Big Data for historical and humanistic scholarship show how to use them what to be wary of and discuss the kinds of questions and new perspectives this new macroscopic perspective opens up Originally authored live online with ongoing feedback from the wider digital history community Exploring Big Historical Data breaks new ground and sets the direction for the conversation into the future Exploring Big Historical Data should be the go to resource for undergraduate and graduate students confronted by a vast corpus of data and researchers encountering these methods for the first time It will also offer a helping hand to the interested individual seeking to make sense of genealogical data or digitized newspapers and even the local historical society who are trying to see the value in digitizing their holdings

The Art of Feature Engineering Pablo Duboue, 2020-06-25

When machine learning engineers work with data sets they may find the results aren't as good as they need Instead of improving the model or collecting more data they can use the feature engineering process to help improve results by modifying the data's features to better capture the nature of the problem This practical guide to feature engineering is an essential addition to any data scientist's or machine learning engineer's toolbox providing new ideas on how to improve the performance of a machine learning solution Beginning with the basic concepts and techniques the text builds up to a unique cross domain approach that spans data on graphs texts time series and images with fully worked out case studies Key topics include binning out of fold estimation feature selection dimensionality reduction and encoding variable length data The full source code for the case studies is available on a companion website as Python Jupyter notebooks

Reassembling the Republic of Letters in the Digital Age Howard Hotson, Thomas Wallnig, 2019

Between 1500 and 1800 the rapid evolution of postal communication allowed ordinary men and women to scatter letters across Europe like never before This exchange helped knit together what contemporaries called the *respublica litteraria* a knowledge based civil society crucial to that era's intellectual breakthroughs formative of many modern values and institutions and a potential cornerstone of a transnational level of European identity Ironically the exchange of letters which created this community also dispersed the documentation required to study it posing enormous difficulties for historians of the subject ever since To reassemble that scattered material and chart the history of that imagined community we need a revolution in digital communications Between 2014 and 2018 an

EU networking grant assembled an interdisciplinary community of over 200 experts from 33 different countries and many different fields for four years of structured discussion The aim was to envisage transnational digital infrastructure for facilitating the radically multilateral collaboration needed to reassemble this scattered documentation and to support a new generation of scholarly work and public dissemination The framework emerging from those discussions potentially applicable also to other forms of intellectual cultural and economic exchange in other periods and regions is documented in this book

A Primer for Teaching Digital History Jennifer Guiliano, 2022-04-22 *A Primer for Teaching Digital History* is a guide for college and high school teachers who are teaching digital history for the first time or for experienced teachers who want to reinvigorate their pedagogy It can also serve those who are training future teachers to prepare their own syllabi as well as teachers who want to incorporate digital history into their history courses Offering design principles for approaching digital history that represent the possibilities that digital research and scholarship can take Jennifer Guiliano outlines potential strategies and methods for building syllabi and curricula Taking readers through the process of selecting data identifying learning outcomes and determining which tools students will use in the classroom Guiliano outlines popular research methods including digital source criticism text analysis and visualization She also discusses digital archives exhibits and collections as well as audiovisual and mixed media narratives such as short documentaries podcasts and multimodal storytelling Throughout Guiliano illuminates how digital history can enhance understandings of not just what histories are told but how they are told and who has access to them

Heritage and Archaeology in the Digital Age Matthew L. Vincent, Víctor Manuel López-Menchero Bendicho, Marinos Ioannides, Thomas E. Levy, 2017-11-10 This book examines how computer based programs can be used to acquire big digital cultural heritage data curate and disseminate it over the Internet and in 3D visualization platforms with the ultimate goal of creating long lasting digital heritage repositories The organization of the book reflects the essence of new technologies applied to cultural heritage and archaeology Each of these stages bring their own challenges and considerations that need to be dealt with The authors in each section present case studies and overviews of how each of these aspects might be dealt with While technology is rapidly changing the principles laid out in these chapters should serve as a guide for many years to come The influence of the digital world on archaeology and cultural heritage will continue to shape these disciplines as advances in these technologies facilitate new lines of research

The book is divided into three sections covering acquisition curation and dissemination the major life cycles of cultural heritage data Acquisition is one of the fundamental challenges for practitioners in heritage and archaeology and the chapters in this section provide a template that highlights the principles for present and future work that will provide sustainable models for digital documentation Following acquisition the next section highlights how equally important curation is as the future of digital documentation depends on it Preservation of digital data requires preservation that can guarantee a future for generations to come The final section focuses on dissemination as it is what pushes the data beyond

the shelves of storage and allows the public to experience the past through these new technologies but also opens new lines of investigation by giving access to these data to researchers around the globe Digital technology promises significant changes in how we approach social sciences cultural heritage and archaeology However researchers must consider not only the acquisition and curation but also the dissemination of these data to their colleagues and the public Throughout the book many of the authors have highlighted the usefulness of Structure from Motion SfM work for cultural heritage documentation others the utility and excitement of crowdsourcing as a citizen scientist tool to engage not only trained students and researchers but also the public in the cyber archaeology endeavor Both innovative tools facilitate the curation of digital cultural heritage and its dissemination Together with all the chapters in this volume the authors will help archaeologists researchers interested in the digital humanities and scholars who focus on digital cultural heritage to assess where the field is and where it is going
