Using Priming Methods In Second Language Research:

Using Priming Methods in Second Language Research Kim McDonough, Pavel Trofimovich, 2011-02-25 Using Priming Methods in Second Language Research is an accessible introduction to the use of auditory semantic and syntactic priming methods for second language L2 processing and acquisition research. It provides a guide for the use, design and implementation of priming tasks and an overview of how to analyze and report priming research. Key principles about auditory semantic and syntactic priming are introduced and issues for L2 researchers to consider when designing priming studies are pointed out. Empirical studies that have adopted priming methods are highlighted to illustrate the application of experimental techniques from psychology to L2 processing and acquisition research. Each chapter concludes with follow-up questions and activities that provide additional reinforcement of the chapter content while the final chapter includes data sets that can be used to practice the statistical tests commonly used with priming data. *Applying Priming Methods to L2 Learning, Teaching and Research* Pavel Trofimovich, Kim McDonough, 2011 This volume features a collection of empirical studies which use priming methods to explore the comprehension, production and acquisition of second language L2 phonology, syntax and lexicon. The term priming refers to the phenomenon in which prior exposure to specific language forms or meanings influences a speaker's subsequent language comprehension or production. This book brings together the various strands of priming research into a single volume that specifically addresses the interests of researchers, teachers and students interested in L2 teaching and learning. Chapters by internationally known scholars feature a variety of priming techniques, describe various psycholinguistic tasks and focus on different domains of language knowledge and skills. The book is conceptualized with a wide audience in mind, including researchers not familiar with priming methods and their application to L2 research, graduate students in second language acquisition and related disciplines, and instructors who require readings for use in their courses.

A Guide to Doing Statistics in Second Language Research Using SPSS and R Jenifer Larson-Hall, 2015-07-24 A Guide to Doing Statistics in Second Language Research Using SPSS and R, Second Edition is the only text available that demonstrates how to use SPSS and R as specifically related to applied linguistics and SLA research. This new edition is up to date with the most recent version of the SPSS software and now also includes coverage of R, a software program increasingly used by researchers in this field. Supported by a number of pedagogical features including tip boxes and practice activities and a wealth of screenshots, this book takes readers through each step of performing and understanding statistical research, covering the most commonly used tests in second language research, including t tests, correlation and ANOVA. A robust accompanying website covers additional tests of interest to students and researchers, taking them step by step through carrying out these tests themselves. In this comprehensive and hands-on volume, Jenifer Larson Hall equips readers with a thorough understanding and the practical skills necessary to conducting and interpreting statistical research effectively using SPSS and R, ideal for graduate students and researchers in SLA, social sciences and

applied linguistics For more information and materials please visit www.routledge.com/cw/larson/hall
