open government data and G cloud and privacy and security in e government ICEL2104-Proceedings of the 9th International Conference on e-Learning Dr Oscar Saavedra Rodriguez,,Dr Teresita Arenas Yáñez,2014 *From Internet of Things to Internet of Intelligence* Marcel Ohanga Odhiambo,Weston Mwashita,2024-04-22 The book focuses on the open challenges associated with the convergence of the Internet of Things and Artificial Intelligence as accommodated in 6G architecture The authors discuss how in many fields such as Natural Language Processing NLP interactive computer games robotics and multiuser virtual environments this convergence is likely to have enormously benefits from artificial intelligence mimicking human intelligence attempting to simulate human intelligence and producing a new intelligent machine capable of processing information with human consciousness behaviour and thinking integrated with appropriate algorithms The book provides users with the fundamentals of IoT architecture AI technology and the architecture of AI and IoT converged networks Furthermore to provide hands on experience with the technology some proposed systems are discussed along with their applications in various sectors such as healthcare transportation smart homes production manufacturing renewable energy and agriculture The book will discuss new technological advances current research trends and industry requirements Discussed open challenges in the field will motivate researchers and stakeholders in industry to provide solutions with some presented in the book to help spark ideas **Corrupted** Jonathan D Jansen,2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly *Challenges of European External Energy Governance with Emerging Powers* Michèle Knodt,Nadine Piefer,2016-03-03 In a multipolar world with growing demand for

energy not least by Emerging Powers such as Brazil India China or South Africa BICS questions of EU external energy governance would at first hand appear to be a high priority Yet reality tells a different story the EU s geographical focus remains on adjacent countries in the European neighbourhood and on issues related to energy security Despite being Strategic Partners and engaging in energy dialogues it seems that the EU is lacking strategic vision and is not perceived as a major actor in energy cooperation with the BICS Thus political momentum for energy cooperation and joint governance of scarce resources is vanishing Resulting from three years of international interdisciplinary research cooperation among academics and practitioners in Europe and the BICS countries within a project funded by the Volkswagen Foundation this volume addresses one of the greatest global challenges Specific focus lies on the bilateral energy dialogues and Strategic Partnerships between the EU and Emerging Powers regarding bilateral inter and transnational energy cooperation Furthermore the analysis provides policy recommendations in order to tap the full potential of energy cooperation between the EU and Brazil India China and South Africa

Crossing the Bridge of the Digital Divide Anthony H. Normore,Antonia Issa Lahera,2018-09-01 Crossing the Bridge of the Digital Divide A Walk with Global Leaders explores the combined effect of the rapid growth of information as an increasingly fragmented information base a large component of which is available only to people with money and or acceptable institutional affiliations In the recent past the outcome of these challenges has been characterized as the digital divide between the information haves and have nots along racial and socio economic lines that seem to widen as time passes To address the issues of digital equity and digital inequality in an effort to bridge the digital divide educational scholars researchers and practitioners are in positions to ensure equitable opportunities are made available for people of all ages races ability sexual orientation and ethnicity in support of social justice for bridging the digital divide The digital divide addresses issues concerning equal opportunity equity and access that have an effect on the development of marginalized and otherwise disenfranchised populations within and across systems nationally and internationally The contributing authors representing Unites States Canada South Africa New Zealand and the UK posit that education institutions can serve as the

bridge to close the digital divide for students who do not have access to information technology in their homes At a time when more computers are made available in schools than ever before the digital divide continues to widen and fewer people in the lowest SES groups are given the opportunity to join the world of computer technology and the internet As a result the influence of leadership activity on institutional racism gender discrimination inequality of opportunity inequity of educational processes digital exclusion and justice have gained currency and attention The contributing national and international authors examine the digital divide in terms of social justice leadership equity and access It is within this context that the authors offer discussions from a lens of their choice i e conceptual review of literature epistemological etc By adopting an educational approach to bridging the digital divide researchers and practitioners can connect and extend long established lines of conceptual and empirical inquiry aimed at improving organizational practices and thereby gain insights that might be otherwise overlooked or assumed This holds great promise for generating refining and testing theories of leadership for equity and access and helps strengthen already vibrant lines of inquiry on social justice
