C. Knipe, 2004-08-13 Presents and surveys research described in literature between December 1999 and November 2000 As in previous volumes new mechanisms for the synthesis of all types of organic compounds will be included as well as such mechanisms as addition and elimination reactions nucleophilic and electrophilic aromatic substitutions and molecular arrangements This annual series on organic reaction mechanisms research provides concise and comprehensive coverage of the years literature as well as discussions on important results Each volume is extensively referenced to previous volumes and primary journals *Advances in Heterocyclic Chemistry*, 1972-04-18 *Advances in Heterocyclic Chemistry* **Fundamentals of Clinical Pharmacokinetics** John G. Wagner, 1975 **London Grain, Seed, and Oil Reporter**, 1925 **Commercial Fisheries Abstracts** U.S. Fish and Wildlife Service, **The Decision to Use the Atomic Bomb** Gar Alperovitz, 1996-08-06 With a new preface by the author Controversial in nature this book demonstrates that the United States did not need to use the atomic bomb against Japan Alperovitz criticizes one of the most hotly debated precursory events to the Cold War an event that was largely responsible for the evolution of post World War II American politics and culture **Commercial Fisheries Abstracts**, 1968 *Mechanism of Myofibril Sliding in Muscle Contraction* Haruo Sugi, Gerald H. Pollack, 2012-12-06 This volume presents the entire proceedings of the symposium organized by one of us H S on November 11 to 15 1991 at Hakone Japan under the title of Mechanism of Myofibril Sliding in Muscle Contraction Among various kinds of energy transduction mechanisms in biological systems the mechanism of muscle contraction has been studied most intensively and extensively over many years Since the monumental discovery by the two Huxleys and coworkers that muscle contraction results from relative sliding between the thick and thin myofilaments attention of muscle investigators has been focused on the question what makes the filaments slide past one another In response to the above question A F Huxley and Simmons put forward a contraction model in 1971 in which globular heads of myosin cross bridges extending from the thick filament first attach to actin on the thin filament and then change their angle of attachment to actin power stroke leading to force generation or myofilament sliding until they detach from the thin filament The rocking cross bridge contraction model seemed to be entirely consistent with the kinetic scheme of actomyosin ATPase published by Lymn and Taylor at the same time thus giving a strong impression to the people concerned that the muscle contraction mechanism would soon be sorted out In his review lecture in 1974 however A F *The Locus of Care* Peregrine Horden, Richard Smith, 2013-01-11 The care of the needy and the sick is delivered by various groups including immediate family the wider community religious organisations and the State funded institutions The Locus of Care provides an historical perspective on welfare detailing who carers were in the past where care was provided and how far the boundary

between family and state or informal and organised institutions have changed over time Eleven international contributors provide a wide ranging examination of themes such as child care mental health and provision for the elderly and question the idea that there has been a recent evolutionary shift from informal provision to institutional care Chapters on Europe and England use case studies and link evidence from ancient and medieval periods to contemporary problems and the recent past whilst studies on China and South Africa look to the future of welfare throughout the world By placing welfare in its historical social cultural and demographic contexts **Locus of Care** reassesses community and institutional care and the future expectations of welfare provision
