**Cycle World Magazine**,1999-01 **The Buddha Within** S. K. Hookham,Susan K. Hookham,1991-01-01 Tathagatagarbha Buddha Nature is a central concept of Mahayana Buddhism crucial to all the living practice traditions of Tibetan and Zen Buddhism Its relationship to the concept of emptiness has been a subject of controversy for seven hundred years Dr Hookam s work investigates the divergent interpretations of these concepts and the way the Tibetan tradition is resolving them In particular she does this with reference to the only surviving Indian commentary on the Tathagatagarbha doctrine the Ratnagotravibhaga This text addresses itself directly to the issue of how to relate the doctrine of emptiness the illusory nature of the world to that of the truly existing changeless Absolute the Buddha Nature This is the first work by a Western writer to present an analysis of the Shentong tradition based on previously untranslated sources The Shentong view rests on meditative experience that is inaccessible to the conceptualizing mind It is deeply rooted in the sutra tradition of Indian Buddhism and is central to an understanding of the Mahamudra and Dzogchen traditions and Tantric practice among Kagyupas and Hyingmapas

Jones,2020-11-30 Winner of the 2021 Toshihide Numata Book Award in Buddhism The assertion that there is nothing in the constitution of any person that deserves to be considered the self tman a permanent unchanging kernel of personal identity in this life and those to come has been a cornerstone of Buddhist teaching from its inception Whereas other Indian religious systems celebrated the search for and potential discovery of one s true self Buddhism taught about the futility of searching for anything in our experience that is not transient and ephemeral But a small yet influential set of Mah y na Buddhist texts composed in India in the early centuries CE taught that all sentient beings possess at all times and across their successive lives the enduring and superlatively precious nature of a Buddha This was taught with reference to the enigmatic expression tath gatagarbha the womb or chamber for a Buddha which some texts refer to as a person s true self The Buddhist Self is a methodical examination of Indian teaching about the tath gatagarbha otherwise the presence of one s Buddha nature and the extent to which different Buddhist texts and authors articulated this in terms of the self C V Jones attends to each of the Indian Buddhist works responsible for explaining what is meant by the expression tath gatagarbha and how far this should be understood or promoted using the language of selfhood With close attention to these sources Jones argues that the trajectory of Buddha nature thought in India is also the history and legacy of a Buddhist account of what deserves to be called the self an innovative attempt to equip Mah y na Buddhism with an affirmative response to wider Indian interest in the discovery of something precious or even divine in one s own constitution This argument is supplemented by critical consideration of other themes that run through this distinctive body of Mah y nist literature the relationship between Buddhist and non Buddhist teachings about the self the overlap between the tath gatagarbha and the nature of the mind and the originally radical position that the only means of becoming liberated from rebirth is to achieve the same exalted status as the Buddha **The**

Makransky,1997-07-31 To enter the Mahayana Buddhist path to enlightenment is to seek both to become free from our dualistic deluded world and to remain actively engaged in that world until all others are free How are these two apparently contradictory qualities to be embodied in the attainment of buddhahood dharmakaya How can one's present practice accomplish that These questions underlie a millennium old controversy over buddhahood in India and Tibet that centers around a cherished text the Abhisamayalamkara Makransky shows how the Abhisamayalamkara's composite redaction from Abhidharma Prajnaparamita and Yogacara traditions permitted its interpreters to perceive different aspects of those traditions as central in its teaching of buddhahood This enabled Indians and Tibetans to read very different perspectives on enlightenment into the Abhisamayalamkara through which they responded to the questions in startlingly different ways The author shows how these perspectives provide alternative ways to resolve a logical tension at the heart of Mahayana thought inscribed in the doctrine that buddhahood paradoxically transcends and engages our world simultaneously Revealing this tension as the basis of the Abhisamayalamkara controversy Makransky shows its connection to many other Indo Tibetan controversies revolving around the same tension disagreements over buddhahood's knowledge embodiment and accessibility to beings in Buddha nature and through the path Tracing the source of tension to early Mahayana practice intuitions about enlightenment the author argues that different perspectives in these controversies express different ways of prioritizing those practice intuitions **Cycle World Magazine** ,1996-01 Fostering Innovation for Agriculture 4.0 Miguel Angel Rapela,2019-10-31 The scientific and technical development of any kind of germplasm is regulated by a vast network of treaties conventions international agreements and national and regional legislation These regulations govern biotechnological innovations in plants and microorganisms access to and use of plant genetic resources and biosafety This complex mix has made it difficult to arrive at global interpretations due to overlaps gaps ambiguities contradictions and lack of consistency The big picture is even more complex as a series of scientific developments gene editing in particular have in some cases rendered these international regulatory frameworks obsolete This book puts forward an innovative approach a Comprehensive Plant Germplasm System The System is a cooperative game theory based proposal for a binding international convention which would supersede all other conventions treaties national and regional legislation covering native varieties and traditional developments heterogeneous plant varieties microorganisms biotechnological inventions plant genetic resources and biosafety regulation In short it offers a comprehensive framework regarding intellectual property biosafety and business regulation and covers all types of germplasm If applied the system is expected to yield higher productivity rates in crops and improved food biodiversity as well as a new paradigm based on the promotion of
