Marginalia in Modern Learning Contexts Reid, Alan J.,2018-11-09 Although reading can be regarded as an isolated and private endeavor the white space in the margins of a printed book or the comments section at the end of an online article can provide a welcomed space for interaction Annotation and marginalia share similar meanings a reader's contribution to a text which might consist of alphabetic image and video content While it has always been more common to think of this strategy in the context of a student and a textbook it is being more widely used through online communications such as commenting on liking and sharing social media posts The behaviors of readers as they engage with a text says a lot about their involvement interest and intentions Marginalia in Modern Learning Contexts is a collection of innovative research on the methods and applications of interaction between readers and texts through digital means such as commenting or physical annotation such as writing in the margins of a book and how these strategies can be applied in educational settings While highlighting topics including social annotation teacher education and technological expertise this book is ideally designed for educators administrators academicians researchers and students seeking current research on digital and physical annotation methods and strategies and their applications in educational environments

Search Computing Stefano Ceri,Marco Brambilla,2010-03-15 Search computing which has evolved from service computing focuses on building the answers to complex search queries by interacting with a constellation of cooperating search services using ranking and joining of results as the dominant factors for service composition The field is multi disciplinary in nature and takes advantage of contributions from other research areas such as knowledge representation human computer interfaces psychology sociology economics and legal sciences The book is divided into three parts The first part includes some visionary contributions on the latest trends in search which is becoming increasingly task oriented and is starting to use ontological knowledge in order to manage complex queries The second part explores background and related technologies which can be considered as parallel fields of research useful both for setting the theoretical premises for search computing and for providing a technological framework for building search computing systems and applications The third part delves into the conceptual and technological problems and issues arising when dealing with search computing as a new search paradigm It provides a unified view of the results of the Search Computing project as achieved exactly one year after its starting date

Pollutant Fate and Transport in Environmental Multimedia Frank M. Dunnivant,Ellyott Anders,2019-03-21 Bridges the gaps between regulatory engineering and science disciplines in order to comprehensively cover pollutant fate and transport in environmental multimedia This book presents and integrates all aspects of fate and transport chemistry modeling various

forms of assessment and the environmental legal framework It approaches each of these topics initially from a conceptual perspective before explaining the concepts in terms of the math necessary to model the problem so that students of all levels can learn and eventually contribute to the advancement of water quality science The first third of Pollutant Fate and Transport in Environmental Multimedia is dedicated to the relevant aspects of chemistry behind the fate and transport processes It provides relatively simple examples and problems to teach these principles The second third of the book is based on the conceptual derivation and the use of common models to evaluate the importance of model parameters and sensitivity analysis complex equation derivations are given in appendices Computer exercises and available simulators teach and enforce the concepts and logic behind fate and transport modeling The last third of the book is focused on various aspects of assessment toxicology risk benefit cost and life cycle and environmental legislation in the US Europe and China The book closes with a set of laboratory exercises that illustrate chemical and fate and transport concepts covered in the text with example results for most experiments Features more introductory material on past environmental disasters and the continued need to study environmental chemistry and engineering Covers chemical toxicology with various forms of assessment United States European and Chinese regulations and advanced fate and transport modeling and regulatory implications Provides a conceptual and relatively simple mathematical approach to fate and transport modeling yet complex derivations of most equations are given in appendices Integrates the use of numerous software packages pC pH EnviroLab Simulators Water Wastewater and Global Issues and Fate 2016 Contains numerous easy to understand examples and problems along with answers for most end of the chapter problems and simulators for answers to fate and transport questions Includes numerous companion laboratory experiments with EnviroLab Requiring just a basic knowledge of algebra and first year college chemistry to start Pollutant Fate and Transport in Environmental Multimedia is an excellent textbook for upper level undergraduate and graduate faculty and students studying environmental engineering and science
