Building Transatlantic Italy Paolo Scrivano, 2017-05-15 At the end of the Second World War America s newly acquired status of hegemonic power together with the launch of ambitious international programs such as the Marshall Plan significantly altered existing transatlantic relations In this context Italian and American architectural cultures developed a fragile dialogue characterized by successful exchanges and forms of collaboration but also by reciprocal wariness The dissemination of models and ideas concerning architecture generated complex effects and frequently led to surprising misinterpretations obstinate forms of resistance and long negotiations between the involved parties Issues of continuity and discontinuity dominated Italian culture and society at the time since at stake was the possible balance between allegedly long established traditions and the prospect of a radical rupture with recent history Architectural culture often contributed to reach a compromise between very diverging attitudes Situated in the larger realm of studies on Americanization this book questions current interpretations of transatlantic relations in architecture By reconsidering the means and effects of the dialogue that unfolded between the two sides of the Atlantic during the postwar years the volume analyzes how cultural and formal models were developed in one context and then modified when transferred to a new one as well as the fortune of this cultural exchange in terms of circulation amplification and simplification

History of Modern Architecture Leonardo Benevolo, 1977 A serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author s closely reasoned formulations Let it be said at once that the format of this work is richly handsome it is a two volume boxed set comprising 844 pages and well over 1 000 high quality illustrations and it reflects throughout its publisher s conviction that good design is an essential not superficial part of bookmaking Beyond that it should be emphasized that this work is not another facile cultural tour of modern architecture It is a serious and original study of the beginnings and development of

modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations rather than to gloss over a lack of substantive content. The book is a translation of the third Italian edition published in 1966 by Benevolo, who is on the faculty of architecture in Venice and has earned an international reputation as a historian of architecture and town planning. His publications embrace the span of time from the Renaissance to the foreseeable future. One such publication, *The Origins of Modern Town Planning* (The MIT Press, 1967), may be read as a prelude to the present work as well as an independent contribution. Perhaps more than any other architectural historian in our time, Benevolo has made a determined effort to place developments in design and planning in their proper social and political settings. Indeed, the author argues that the development of the modern movement in architecture was determined not by aesthetic formalisms but largely by the social changes that have occurred since about 1760. After the middle of the eighteenth century, without the continuity of formal activity being in any way broken, indeed while architectural language seems to be acquiring a particular coherence, the relations between architect and society began to change radically. New material and spiritual needs, new ideas and modes of procedure arise both within and beyond the traditional limits, and finally they run together to form a new architectural synthesis that is completely different from the old one. In this way it is possible to explain the birth of modern architecture, which otherwise would seem completely incomprehensible. This second volume is concerned with the modern movement proper from 1914 to 1966. The author emphasizes the unity of the movement, rejecting the usual treatment that allots to the individual architects separate and unconnected biographical accounts. Benevolo remarks at one point: "When one talks about modern architecture, one must bear in mind the fact that it implies not only a new range of forms but also a new way of thinking, whose consequences have not yet all been calculated." His main concern is to provide a more exact calculation of those consequences.

Urban Visions Carmen Díez Medina, Javier Monclús, 2018-06-23
 This book is a useful reference in the field of urbanism. It explains how the contemporary city and landscape have been shaped by certain twentieth-century visions that have carried over into the twenty-first century. Aimed at both students and professionals, this collection of essays on diverse subjects and cases does not attempt to establish universal interpretations; it rather highlights some outstanding episodes that help us understand why the planning culture has given way to other forms of urbanism, from urban design to strategic urbanism or landscape urbanism. Compared with global interpretations of urbanism based on socioeconomic history or architectural historiography, *Urban Visions: From Planning Culture to Landscape Urbanism* aims to present the discipline couched in international contemporary debate and adopt a historic and comparative perspective. The book's contents pertain equally to other related disciplines such as architecture, urban history, urban design, landscape architecture, and geography. Foreword by Rafael Moneo. *Nervi per l'industria* Federica Stella, 2011

Fondamenti della rappresentazione architettonica Vittorio Ugo, 2020-05-01
 Tra l'universo discorsivo, teorico, critico, storico e quello fisico, materiale, spaziale, costruttivo dell'architettura, la rappresentazione chiamata a svolgere un

fondamentale ruolo di raccordo garantendo simultaneamente una doppia funzionalità nella direzione ermeneutica ed in quella euristica. Nell'analizzarne le diverse articolazioni il libro si propone di costruirne e descriverne i fondamenti ed i modi di appartenenza ai processi della progettazione e della documentazione critica. La rappresentazione dell'architettura si costruisce quindi quale momento essenziale nella determinazione della sua forma architettonica e nelle relazioni che questa instaura con l'abitare, le geometrie e le strutture epistemologiche e poetiche del pensiero. Oltre alla nozione di forma alla mimesis ed alle sottili questioni che questa solleva in campo architettonico, *poiesis* e *techné* sono infatti i principali strumenti concettuali di riferimento che il libro discute e pone alla base della rappresentazione nel suo aspetto di luogo privilegiato di formazione del progetto e della documentazione critica. *Recupero abitativo dei sottotetti* Giovanna Mottura, 2013

Questioni di progettazione architettonica Alberto Manfredini, 2000 *Dooroom* Gelvi, Maria, 2023-01-25. La città un insieme di case su case e la casa una sommatoria di stanze immaginarie. La stanza, il frutto dell'immaginazione poetica, il luogo sacro dove ha inizio la vita, un universo dove micro e macro si confondono nel tentativo di coinvolgere spiritualmente l'essere umano ed esaltarne l'essenza. O almeno lo era fino a ieri, perché nel presente tutto sembra diverso e le stanze che abitiamo si sono lentamente trasformate in trappole inospitali diventando spazi incapaci di accogliere la vita. Così il neologismo *Dooroom* nasce per descrivere quel luogo privato non più casa né stanza per far luce sulle trasformazioni della casa e cercare di rimettere i suoi spazi in gioco immaginando un posto nuovo dove poter vivere dando ascolto ai desideri dell'individuo contemporaneo. **La coupure entre architectes et intellectuels, ou les enseignements de l'Italophilie** Jean-Louis Cohen, 2015-06-11. Confronter les codes et les codes artistiques entre la France et l'Italie en matière d'urbanisme. Dans cet ouvrage initialement publié en 1984 et rapidement devenu introuvable, Jean-Louis Cohen analyse un moment clé pour la théorie et la pratique de l'architecture contemporaine marqué par les changements intenses des années 1970 entre l'Italie et la France. Il en fut la fois l'un des témoins et l'un des acteurs. Cette chronique permet de découvrir les causes et les effets de la coupure constatée entre les architectes et les intellectuels en France depuis la moitié du XIXe siècle au travers d'une réflexion sur les rares contacts qu'ils entretenaient et d'une réflexion sur les malentendus qui jalonnent leurs rapports. Cette coupure est rendue particulièrement patente par la confrontation des situations respectives de la France et de l'Italie. Au début des années 1970, une véritable fascination pour la culture architecturale italienne saisit les Français attentifs aux nouveaux discours sur l'urbanisme et sur l'histoire. Une perspective s'ouvrit ainsi pour le dépassement du fossé existant, un nouveau mode conduisant les architectes se penser comme concepteurs et comme intellectuels. Le livre restitue en particulier les trajectoires d'Ernesto Nathan Rogers, Aldo Rossi, Vittorio Gregotti et Manfredo Tafuri tout autant que celles des italophiles comme Bernard Huet ou Philippe Panerai. Un ouvrage de référence pour comprendre la césure entre les architectes et les intellectuels. CE QU'EN PENSE LA CRITIQUE. Ce livre est la rédaction d'un ouvrage paru en 1984, fruit d'une recherche financée par la Direction de l'Architecture France, il garde toute son actualité et son questionnement.
