is showing that cholesterol levels are a poor predictor of heart disease and that standard prescriptions for lowering it such as ineffective low fat high carb diets and serious side effect causing statin drugs obscure the real causes of heart disease Even doctors at leading institutions have been misled for years based on creative reporting of research results from pharmaceutical companies intent on supporting the 31 billion a year cholesterol lowering drug industry The Great Cholesterol Myth reveals the real culprits of heart disease including inflammation fibrinogen triglycerides homocysteine belly fat triglyceride to HDL ratios and high glycemic levels Best selling health authors Jonny Bowden PhD and Stephen Sinatra MD give readers a four part strategy based on the latest studies and clinical findings for effectively preventing managing and reversing heart disease focusing on diet exercise supplements and stress and anger management Myths vs Facts Myth High cholesterol is the cause of heart disease Fact Cholesterol is only a minor player in the cascade of inflammation which is a cause of heart disease Myth Saturated fat is dangerous Fact Saturated fats are not dangerous The killer fats are the trans fats from partially hydrogenated oils Myth The higher the cholesterol the shorter the lifespan Fact Higher cholesterol protects you from gastrointestinal disease pulmonary disease and hemorrhagic stroke Myth High cholesterol is a predictor of heart attack Fact There is no correlation between cholesterol and heart attacks Myth Lowering cholesterol with statin drugs will prolong your life Fact There is no data to show that statins have a significant impact on longevity Myth Statin drugs are safe Fact Statin drugs can be extremely toxic including causing death Myth Statin drugs are useful in men women and the elderly Fact Statin drugs do the best job in middle aged men with coronary disease Myth Statin drugs are useful in middle aged men with coronary artery disease because of its impact on cholesterol Fact Statin drugs reduce inflammation and improve blood viscosity thinning blood Statins are extremely helpful in men with low HDL and coronary artery disease *Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations for Fiscal Year 2002* United States. disease This book fills an important need for a comprehensive explanation of the pharmaceutical industry's efforts to profit from statin drugs of the trivial effect on prevention of heart disease by these drugs and of their serious toxic side effects More importantly the book describes the true causes of heart disease and emphasizes optimal nutrition as the correct approach to prevention Kilmer McCully MD author of *The Heart Revolution* **Pharmacist Services** Jon
