Transfer students postsecondary institutions could promote more consistent consideration of coursework by not basing determinations on accreditation : report to congressional requesters United States. Government Accountability Office, 2005

Resources in Education ,2000-04 Guide for Job Seekers in New Jersey State and Local Civil Service Positions New Jersey. Department of Civil Service, 1976 *New Jersey Register* ,2013 **The Contradictory College** Kevin J.

Dougherty, 1994-07-01 This book systematically analyzes the evidence on four key issues that have divided commentators on the community college The community college s impact on students business and the universities the factors behind its rise since 1900 the causes of its swift vocationalization after 1960 and what direction the community college should take in the future **Implementing Transfer Associate Degrees: Perspectives From the States** Carrie B. Kisker, Richard L.

Wagoner, 2013-02-25 In recent years a convergence of several forces increased legislative involvement in higher education governmental and philanthropic pressure to increase postsecondary degree and certificate production and fiscal belt tightening at colleges and universities across America has resulted in efforts to significantly reform community college to university transfer and articulation processes One increasingly popular method of reform is the implementation of transfer associate degrees statewide pathways or degree programs that allow students to both earn an associate degree from a community college and transfer seamlessly into a state university with junior status This volume of New Directions for Community Colleges outlines the elements of effective transfer associate degrees and explores their implementation in six states This is the 160th volume of this Jossey Bass quarterly report series Essential to the professional libraries of presidents vice presidents deans and other leaders in today s open door institutions New Directions for Community Colleges provides expert guidance in meeting the challenges of their distinctive and expanding educational mission **Lasting Change in Foreign Language Education** John L. Watzke, 2003-03-30 Lasting Change in Foreign Language Education presents a historical account of foreign language in general education The author examines the struggle of this subject discipline to align with the changing mission of secondary education as it emerged as the predominant institution enrolling students in the study of second languages This 100 year history suggests trends persistent across major periods of reform to explain current problems in the expansion of learning opportunities in foreign language Included is a complete database of education statistics on foreign language education and national and state education law from 1899 to the present Analysis of this data is presented in multiple formats to describe the historical capacity of the education system to achieve reform A review of contemporary standards based education initiatives in states and school districts similarly serves to reflect how historical trends continue to restrict change Concise policy implications are suggested as a means to address historical precedence and the greater mission of general education in the development of education policy and its transformation into practice Policy development must include a greater understanding of the historical development of foreign language in general education

This vital link has been lacking in the past century as foreign language has struggled to realign itself with the changing mission of general education. For example, there are distinct curricular differences between a general education for all students and one for leadership and higher education. Only the latter makes room for solid foreign language education. In addition, the study of foreign language has remained primarily a beginning level endeavor for the majority of students over the past century. This trend results in significant pressure on the beginning level curriculum, particularly during periods of reform to provide multiple academic outcomes in education.
