 Center (U.S.),1963 The Great Curriculum Debate Tom Loveless,2004-05-13 Since the early twentieth century American
 educators have been engaged in a heated debate over what schools should teach and how they should teach it The partisans
 education progressives and education traditionalists have usually kept their disagreements within the walls of the nation s
 schools of education Periodically however arguments have erupted which have generated headlines and attracted public
 attention making clear the potential for bitterness and rancor in education politics In the 1990s progressives and
 traditionalists squared off in a dispute over reading and mathematics Arguments over how best to teach these two subjects is
 detailed in The Great Curriculum Debate How Should We Teach Reading and Math This book includes contributions from
 distinguished scholars from both sides of the debate as well as influential nonpartisans The proponents of whole language
 and phonics present their opposing views on reading Advocates and opponents of NCTM math reform the agenda of the
 National Council of Teachers of Mathematics NCTM discuss their differing opinions about math Although the authors
 disagree on many of the most important aspects of learning they agree on one point the school curriculum matters Decisions
 made now about the content of reading and mathematics will have long term consequences not only for students and schools
 but for society as a whole Contributors include E D Hirsch Jr University of Virginia Gail Burrill Mathematical Sciences
