ZDR time-switch

For fully-automatic switching (on, off or change-over) of circuits such as lighting, heating, ventilation, pumps, cooling plant, alarm systems etc. Microprocessor-controlled, fully-electronic hour, day and week time-switch. Capacitor serves as reserve power supply. External memory for the reading in and out of switching times (accessory). Front plate with illuminated LCD panel, keyboard and drawer with operating instructions. Housing with sealable terminal cover, both of yellow thermoplastic. Suitable for installation onto walls, in control panels (with accessory) or top-hat rail as per DIN/EN 50022. Terminal socket with plug-in connector and screwed terminals for cables up to 6 mm.

| 275615/002 | Baseplate with earthed plug for ZDR 111 (attachment for table-top model) |

Operation

Memotime is a microprocessor-controlled, fully-electronic time-switch with programmable hour, day and week settings; with LCD display. Applying power across terminals 1 and 2 renders the clock operable.

The bistable output relay retains its status even after a power failure, though no switching operations are carried out in such cases. When power is restored, the appropriate switching status is re-instated in accordance with the program.

The switching status can also be set by hand using the ON/OFF buttons. By switching over to TIME, the switching program in the memory is overridden (holiday function) without loss of data.
