Save The Children Procurement Manual:

Sustainable Practice for the Facilities Manager Sunil Shah, 2008-04-15 sectors including offices retail and manufacturing It explains the facilities manager's role in incorporating sustainability into the whole life cycle of a building from initial briefing to final disposal. The book takes a structured approach: master planning and real estate acquisitions and disposals, design, construction and commissioning, refurbishment, fit out and project management, maintenance, operation, occupant satisfaction. Sustainable Practice for the Facilities Manager fills the gap between the policy level sustainability books and the detailed technical documents by focusing on the what and how of planning and implementing sound environmental management practices in the context of FM operations. It covers policy and trends on global, European and UK levels affecting businesses, compliance requirements for organisations including some sector specific areas and best practice with good and bad case studies showing the business benefits of incorporating sustainable practice into day to day activities. The book is for facilities management professionals, public and private organisations owning properties, property companies, institutional investors, building services or supplier organisations and will help you deliver an improved, operationally performing facility. Sunil Shah, Technical Director and Head of Sustainability, Jacobs. Sunil has over eight years consultancy experience within the built environment reviewing lifecycle environmental and social impacts from facilities. He has experience in a number of sectors providing strategic consultancy support for clients including GlaxoSmithKline, BP, BAA, HM Prison Service, Pfizer and London Fire Brigade. Sunil has most recently been involved in supporting the inclusion of facilities management within the DTI's Sustainable Construction Strategy.
