The News Media in Puerto Rico Federico Subervi-Vélez, Sandra Rodríguez-Cotto, Jairo Lugo-Ocando, 2020-10-27 The News Media in Puerto Rico offers a synopsis as well as a critical analysis of the Island's news media system with emphasis on the political and economic factors that most influence how the media operate. The authors also document the impact of Hurricane Maria on the media structures and the changing media landscape given the political, economic and colonial strictures. Building on interviews with news media professionals, the book further presents detailed insights about journalism and journalism education in these times of crises. The final chapters include theoretical frameworks and methodological guidelines for the analysis of other colonial, post colonial and neo colonial media systems with research recommendations valuable for future studies of the Island's media as well as for cross national comparisons. This book will be an essential read for students and scholars interested in learning not only about the Puerto Rican and Latin American mass media but also the media systems of other colonial neo colonial countries.

Media Firms Robert G. Picard, 2014-04-04 Media Firms presents studies applying the company level approach to media and communication firms. It explores differences among missions, strategies, organizational choices and other business decisions. Reviewing economic factors and pressures on media and communications companies, this book seeks to improve understanding of how these elements affect market and company structures, operations and performance of firms. The chapters, written by leading scholars worldwide, were selected from papers on the theme of media firms presented at the 5th World Media Economics Conference hosted by the Turku School of Economics and Business Administration and The Journal of Media Economics. The collected studies provide an overview of economic and related managerial issues affecting the structures of markets in which firms compete, the operations of media and communications firms and their financial performance. As a result, it expands the discussion of economic issues traditionally associated with the field due to narrowed focus of initial books in media economics. It is hoped that this book will induce additional avenues of inquiry regarding such issues.
