Without sharpening, find the shortest pencil you can.  
Measure it in centimeters.

Eat an apple, or share an apple with someone

Read a book you have never read before

Make a paperclip chain as long as you can  
- see if you can get it to 30 cm

Solve a math question

Find objects that are a circle, triangle, and square  
- trace them onto a piece of paper

Draw a map of your house or your school

Do a science experiment

Draw a self-portrait (a picture of you!)  
and include your age and grade!

Do 20 minutes of physical activity

Try something new (eat a new food, listen to  
a new song, learn a new skill)

Write out a goal for this school year

to effective learning      **Teaching Numeracy** Margie Pearse, K. M. Walton, 2011-03-23 Do some of your students arrive at wildly wrong answers to mathematical problems but have no idea why? If so, they are not alone. Many students lack basic numeracy, the ability to think through the math logically, solve problems, and apply it outside of the classroom. This book outlines nine critical thinking habits that foster numerate learning and details practical ways to incorporate those habits into instruction. Referencing the new common core standards, NCTM standards, and established literacy practices, the authors include how you can use this in your math class tomorrow. Applications throughout the book show you how to monitor and repair students' understanding, guide students to recognize patterns, represent mathematics non-linguistically, encourage questioning for understanding, develop students' mathematics vocabulary, create a collaborative environment. Later chapters show how to develop numeracy-rich lesson plans and provide several ready-to-use models with clear directions and student handouts. The book's practices, activities, and problems will help you move your students from simply doing the math to a deeper understanding of how to think through the math.
